Handbook of Research on
Engaging Digital Natives in
Higher Education Settings

Part of the Advances in Higher Education and Professional Development Book Series

Margarida M. Pinheiro (University of Aveiro, Portugal) and Dora Simões (University of Aveiro, Portugal)

Description:

The integration of technology has become so deeply rooted into modern society that the upcoming generation of students has never known a world without such innovations. This defining trait calls for an examination of effective methods in which to support and motivate these learners.

The Handbook of Research on Engaging Digital Natives in Higher Education Settings focuses on the importance of educational institutions implementing technology into the learning and teaching process in order to prepare for students born into a digital world.

Readers:

Highlighting relevant issues on teaching strategies and virtual education, this book is a pivotal reference source for academicians, upperlevel students, practitioners, and researchers actively involved in higher education.
