Computers in Clinical Practice (IJCCP)

Formerly International Journal of Computational Models and Algorithms in Medicine (IJCMAM)

ISSN: 2470-8526; EISSN: 2470-8534
Established 2016; Published Semi-Annually

Editor(s)-in-Chief: Athina A. Lazakidou (University of Peloponnesse, Greece)

The International Journal of Computers in Clinical Practice (IJCCP) provides comprehensive coverage on computational capabilities, models, and implementation for clinical applications. IJCCP covers a variety of methods for medical practice, treatment, and documentation using emerging computer-based tools. This journal focuses on state-of-the-art research on digital solutions in physician’s offices as well as hospitals and medical laboratory settings and is essential to advancing the literature currently available in the medical field.

The mission of the International Journal of Computers in Clinical Practice (IJCCP) is to bring together a compendium of quality research work in the field of computer-based technology in healthcare and computational applications for patient diagnosis, treatment, and care. This journal emphasizes sound research on the latest digital solutions in the field of healthcare in addition to recommendations for real-world implementation and case studies showcasing industry successes and pitfalls. Targeting researchers, academicians, and healthcare professionals and students, IJCCP provides a forum for sharing and developing new research methods, gaining knowledge about innovative techniques, and discussing new problems and challenges to develop ideas and implement existing methods in the field of healthcare.

Individual Pricing
Print + Free E-Access: $340.00
E-Access + Free Print $340.00

Institution Pricing
Print + Free E-Access: $940.00
E-Access + Free Print $940.00

Topics Covered:
- Classification and prediction models
- Clinical decision support
- Clinical trials
- Computational networks for medical knowledge sharing
- Computer technology for diagnostic testing
- Computer-assisted health monitoring
- Computer-assisted surgery
- Computerized medical records systems
- Computers in clinical social work
- Computers in dentistry
- Computers in medical education
- Computers in nursing practice
- Computers in psychotherapy and mental health
- Disease monitoring and management
- Electronic data collection
- Handheld computers in clinical practice
- Hospital Information Systems
- Imaging techniques
- Security and privacy of electronic health records
- Virtual medical laboratories
- Wearable computing for health applications

SUBMISSION INFORMATION
Prospective authors should note that only original and previously unpublished articles will be considered. Interested authors must consult the journal’s guidelines for manuscript submissions at http://www.igi-global.com/journals/guidelines-for-submission.aspx prior to submission. All article submissions will be forwarded to the Editorial Review Board for double-blind, peer review.

All submissions and inquiries should be directed to the attention of:
Athina Lazakidou, lazakid@uop.gr

All manuscript submissions to IJCCP should be sent through the online submission system:
http://www.igi-global.com/authoreditors/titlesubmission/newproject.aspx

Email: marketing@igi-global.com
Phone: 717-533-8845 x100
Toll Free: 1-866-342-6657
Fax: 717-533-8661 or 717-533-7115

EDITOR-IN-CHIEF BIO

Athina Lazakidou currently works at the Department of Economics at the University of Peloponnese in Greece as an Assistant Professor of Health Informatics. She worked as a Lecturer and as an Assistant Professor at the Department of Nursing at the University of Peloponnese (2008-2015) and as a Visiting Lecturer at the Department of Computer Science at the University of Cyprus (2000-2002). She did her undergraduate studies at the Athens University of Economics and Business (Greece) and received her BSc in Computer Science in 1996. In 2000, she received her Ph.D. in Medical Informatics from the Department of Medical Informatics, University Hospital Benjamin Franklin at the Free University of Berlin, Germany. She is also an internationally known expert in the field of computer applications in health care and biomedicine, with six books and numerous papers to her credit. She was also Editor of the “Handbook of Research on Informatics in Healthcare and Biomedicine” and “Handbook of Research on Distributed Medical Informatics and E-Health”, the best authoritative reference sources for information on the newest trends and breakthroughs in computer applications applied to health care and biomedicine. Her research interests include health informatics, databases, clinical decision support systems, hospital and clinical information systems, electronic medical record systems, collaborative systems, web-based applications in health care and other areas.
