Global Trends in Intelligent Computing Research and Development

Part of the Advances in Computational Intelligence and Robotics Book Series

B.K. Tripathy (VIT University, India) and D.P. Acharjya (VIT University, India)

As the amount of accumulated data across a variety of fields becomes harder to maintain, it is essential for a new generation of computational theories and tools to assist humans in extracting knowledge from this rapidly growing digital data.

Global Trends in Intelligent Computing Research and Development brings together recent advances and in depth knowledge in the fields of knowledge representation and computational intelligence. Highlighting the theoretical advances and their applications to real life problems, this book is an essential tool for researchers, lecturers, professors, students, and developers who have seek insight into knowledge representation and real life applications.

Topics Covered:

- Business Intelligence
- Swarm Intelligence
- Outlier Detection
- Knowledge Discovery in Databases
- Algorithms for Knowledge Representation
- Data Preprocessing
- Engineering Science
- Feature Selection/Instance
- Rough-Fuzzy Computing
- Theoretical Foundations

Print: US $235.00  |  Perpetual: US $355.00  |  Print + Perpetual: US $470.00

Pre-pub Discount:* Print: US $225.00 | Perpetual: US $335.00
* Pre-pub price is good through one month after publication date.

Market: This premier publication is essential for all academic and research library reference collections. It is a crucial tool for academicians, researchers, and practitioners. Ideal for classroom use.

B. K. Tripathy a Senior Professor in the School of Computing Sciences and Engineering, VIT University, at Vellore, India. He has published more than 190 technical papers in various international journals, conferences, and book chapters and has guided 14 scholars for their Ph.D degrees in both mathematics and computer science. He is associated with many professional bodies like IEEE, ACEEE, ACM, IBSS, AISTC, ISTP, CSI, AMS, and IMS. He is in the editorial board of several international journals like CTA, ITTA, AMMS, IJCTE, AISS, AIT, and IJPS and is a reviewer of over 40 international journals like Mathematical Reviews, Information Sciences, Analysis of Neural Networks, Journal of Knowledge Engineering, Mathematical Communications, IEEE Transactions on Fuzzy Systems and Journal of Analysis. His research interest includes fuzzy sets and systems, rough sets and knowledge engineering, data clustering, soft computing, granular computing, theory of multisets, list theory, content based learning, remote laboratories and social networks.
