Utilizing Virtual and Personal Learning Environments for Optimal Learning

Part of the Advances in Educational Technologies and Instructional Design (AETID) Book Series

Krista Terry (Appalachian State University, USA) and Amy Cheney (Appalachian State University, USA)

Description:
The integration of emerging technologies in higher education presents a new set of challenges and opportunities for educators. With a growing need for customized lesson plans in online education, educators are rethinking the design and development of their learning environments.

Utilizing Virtual and Personal Learning Environments for Optimal Learning expertly combines informative chapters and relevant case studies on the effective use of technology to enhance online education for students of varying learning styles and abilities.

This publication features timely research and case studies focused on online teaching and learning techniques in higher education including immersive technologies, research methodologies, and pedagogical designs.

Readers:
This publication is an essential reference source for educators, researchers, professionals, and upper-level students with an interest in leveraging digital technologies and virtual environments to enhance personalization in learning.

Topics Covered:
- Educational Technologies
- E-Portfolios
- Institutional Learning Management
- Learning Games
- Multi-User Virtual Worlds
- Second Language Learning
- Virtual Self
- Vocational Education
