Chapter 1
Takaomi Kobayashi (Nagaoka University of Technology)
INTRODUCTION OF ENVIRONMENTAL MATERIALS
INTRODUCTION
BACKGROUND
GREEN CHEMISTRY FOR SUSTAINABLY RENEWABLE SOURCES
ENVIRONMENTAL MATERIALS IN SUSTAINABILITY
Environmental green technology
ENVIRONMENTAL MATERIALS IN SUSTAINABILITY
Agro-industrial biomass wastes and biopolymers
Mine wastes for environmental materials
GREEN TECHNOLOGIES LEADING FOR SUSTAINABLE SOCIETY
CONCLUSION

Chapter 2
Karla Tovor (Universidad de Ciudad Juárez), Takaomi Kobayashi (Nagaoka University of Technology)
Natural Material Source of Bagasse Cellulose and Their Application to Hydrogel Films
INTRODUCTION
BACKGROUND
CELLULOSIC BAGASSE FOR SUSTAINABLE MATERIAL SOURCE
Cellulosic fibers and its classification
Cellulose fibrous structure
Bagasse's wastes
Properties of cellulose fibers
CHEMICAL TREATMENT OF BAGASSE FIBERS
MATERIALS ELABORATED WITH REGENERATED CELLULOSE
Utilization of regenerated cellulose and its applications
Fabrication of regenerated cellulose
HYDROGEL FILMS ELABORATED FROM REGENERATED CELLULOSE FOR MEDICAL APPLICATIONS
Scaffolds and Cell Adhesion Materials for Tissue Engineering
APPLICATIONS DEVELOPMENT IN CURRENT AND FUTURE
The Future
CONCLUSION

Chapter 3
Kanoktip Boonkerd (Chulalongkorn University)
DEVELOPMENT AND MODIFICATION OF NATURAL RUBBER FOR ADVANCED APPLICATION
INTRODUCTION
MODIFIED FORMS OF NATURAL RUBBER
PHYSICAL MODIFICATION OF NATURAL RUBBER
CHEMICAL MODIFICATION OF NATURAL RUBBER BY GRAFTING
NATURAL RUBBER NANOCOMPOSITES
Rubber Clay/Nanocomposites
Polymer/Clay Nanocomposite Structure
Organoclay
Methods for Preparation of Polymer/Clay Nanocomposite
Natural Rubber/Clay Nanocomposite
RUBBER/CARBON NANOTUBE NANOCOMPOSITES
Carbon Nanotube
Natural Rubber/Carbon Nanotube Nanocomposites
RUBBER/GRAPHENE NANOCOMPOSITES
Graphene
Natural Rubber/Graphene Nanocomposites
CONCLUSION
Chapter 4
Anyporn Boonmahitthisud (Chulalongkorn University)
NATURAL RUBBER AND RUBBER BLEND NANOCOMPOSITES: REINFORCEMENT OF NATURAL RUBBER WITH POLYMER-ENCAPSULATED INORGANIC NANOHYBRID PARTICLES
INTRODUCTION
BACKGROUND
Pre-treatment of nSiO2 surface by a coupling agent and its characterization
Synthesis of polymer-encapsulated inorganic nanohybrid particle
Innovative polymerization method to synthesize polymer-encapsulated nSiO2 nanohybrid particles and its characterization
Properties of NR and rubber blend nanocomposites reinforced with PS-nSiO2 nanohybrid particles
CONCLUSION

Chapter 5
Pramit Potiyaraj (Chulalongkorn University)
Poly(Lactic Acid) Generated for Advanced Materials
INTRODUCTION
BACKGROUND
A new promising bioplastics
Production Processes
Economic Situation
Commercial Products
DEGRADATION OF PLA
Biodegradation mechanism
Standard Test Method
Other Disposal Methods
INNOVATIVE PLA BLENDS & COMPOSITES
Toughening of PLA
PLA composites
APPLICATIONS OF PLA
FUTURE RESEARCH DIRECTIONS
CONCLUSION

Chapter 6
Wan Ahmad Kamil Mahmood and Mohammad Hossein Azarian (Universiti Sains Malaysia)
ORGANIC-INORGANIC COMPOSITE (IOC) MATERIALS FROM LIQUID NATURAL RUBBER AND EPOXIDISED NATURAL RUBBER DERIVATIVES: PROSPECTS AND APPLICATIONS
INTRODUCTION
Inorganic-Organic Composite Materials And Sol-Gel Techniques
Natural Rubber and its Modified Derivatives
Epoxidized Natural Rubber
SYNTHESIS OF ZIRCONIA NETWORKS WITHIN ENR-50 FILM BY SOL-GEL ROUTE
Interaction of zirconia network with ENR-50
Morphology, Thermal and Optical Properties Study of ENR-50/zirconia
CONCLUSION

Chapter 7
Pham Thanh Huyen (Hanoi University of Science and Technology)
CLAY MINERALS CONVERTED TO POROUS MATERIALS AND THEIR APPLICATION, CHALLENGE AND PERSPECTIVE
INTRODUCTION
BACKGROUND
MAIN FOCUS OF THE CHAPTER
Acid Activation of bentonite in procedure and applications
Conversion bentonite to pillar clay in the procedure, characterization and application
Conversion of kaolin to zeolite
FUTURE RESEARCH DIRECTIONS
CONCLUSION
Chapter 8
Sujittra Onutai²,³, Sirithan Jiemsiriler², Takaomi Kobayashi⁴
(¹Nagaoka University of Technology, Japan, ²Chulalongkorn University)
GEOPOLYMER SOURCED WITH FLY ASH AND INDUSTRIAL ALUMINUM WASTE FOR SUSTAINABLE MATERIALS
INTRODUCTION
BACKGROUND
UTILIZATION OF ALUMINIUM WASTE BASED GEOPOLYMER
FLY ASH BASED GEOPOLYMERS
CONCLUSION

Chapter 9
Ahmed M. Elsayed², Hassan J. Dakkama²,⁴, Saad Mahmoud³, Raya Al-Dadah⁵, Wassem Kaila⁶
(¹School of Engineering, University of Bath, UK, ²Mechanical Engineering Department, Alexandria University, Egypt, ³School of Mechanical Engineering, University of Birmingham, UK, ⁴Middle Technical University, Faculty of Engineering, Baghdad, Iraq ⁵Faculty of Science and Engineering, University of Wolverhampton, UK)
SUSTAINABLE COOLING RESEARCH USING ACTIVATED CARBON ADSORBENTS AND THEIR ENVIRONMENTAL IMPACT
INTRODUCTION
Fundamentals of adsorption systems
Classification of activated carbon materials and recent research
Characterization of adsorbent materials
Activated carbon/ refrigerant adsorption characterization
Adsorption cooling configurations as sustainable system
Environmental concerns of adsorption cooling
CONCLUSION

Chapter 10
Shinya Ikematu, Ipputa Tada, Yasuma Nagasaki (National Institute of Technology, Okinawa college)
ANALYSIS OF LIPIDS PRODUCED BY MICROALGAE ISOLATED FROM THE AREA AROUND OKINAWA, JAPAN
INTRODUCTION
Purpose and background
Microalgae for lipid producing
Saturated and unsaturated fatty acids
METHODS
Sampling of microalgae from the field
Isolation and culture of microalgae from water samples and their sample preparation for the lipid analysis
Lipid analyses of the cultivated samples with microscopic observation
LIPID ANALYSES OF THE CULTIVATED SAMPLES WITH GC/MS FOR THE LIPID COMPONENTS PRODUCED BY CULTURED MICROALGAE
Preparation of the GC/MS samples from the crude microalgae extract
GC/MS analysis of fatty acid methyl esters
EVALUATION RESULTS OF LIPID MICROALGAE ISOLATED FROM OKINAWA

Chapter 11
Truong Thi Cam Trang (Vietnam National University- University of Science - Ho Chi Minh City)
STUDY ON THE USE OF BIOMASS POLYMER SHEETS IN WATER/ALCOHOL PERVAPORATION AS A SUSTAINABLE SOURCE OF ALCOHOL ENERGY
INTRODUCTION
MATERIALS FOR BIOPOLYMER MEMBRANES
Cellulose
Chitosan
BIOPOLYMER FILMS AND MEMBRANES MADE OF CELLULOSE
PERVERAPORATION PROCESS BY BIOPOLYMER MEMBRANES
RESEARCH ON CELLULOSE SHEETS USED IN WATER/ALCOHOL PERVAPORATION
Vulcanized Paper for Separation of Alcohol Aqueous Solutions by Pervaporation
FABRICATION AND CHARACTERIZATION OF PULP/CHITOSAN COMPOSITE FOR PERVERAPORATION OF ETHANOL/WATER MIXTURE
Characteristics of Chitosan/Cellulose membranes
CONCLUSION

Chapter 12
Siriporn Taokaew\textsuperscript{1}, Muenduen Phisalaphong\textsuperscript{2}, and Bi-min Zhang Newby\textsuperscript{3} (\textsuperscript{1}Nagaoka University of Technology, \textsuperscript{2}Chulalongkorn University, \textsuperscript{3}The University of Akron)

**BACTERIAL CELLULOSE: BIOSYNTHESSES, MODIFICATIONS, AND APPLICATIONS**

**INTRODUCTION**

**BACKGROUND**

**BIOSYNTHESSES OF BACTERIAL CELLULOSE HYDROGEL**

Culture Media

Cultivation Conditions

Purifications and Storage

**MODIFICATIONS OF BACTERIAL CELLULOSE HYDROGEL**

Physical Modifications

Chemical Modifications

**APPLICATIONS OF BACTERIAL CELLULOSE**

Food and cosmetic products

Biomedical Applications

Membrane Separation

Green Products

**CONCLUSION**

---

**Chapter 13**

Minoru Satoh (National Institute of Technology, Ibaraki College)

**METAL ION SEPARATION WITH FUNCTIONAL ADSORBENTS AND PHYTOREMEDICATION USED AS SUSTAINABLE TECHNOLOGIES**

**INTRODUCTION**

**ADVANCED TOPICS ON SEPARATION TOOLS OF METAL IONS**

Separation of metal ions with chemical materials

Ionic Liquids for green solvent used as separation chemicals

**SEPARATION BY USING BIOMASS WASTES**

Plant and wooden wastes for biosorbents

Animal wastes for biosorbents

Bioresmediation for heavy metal decontamination

**CONCLUSION**

---

**Chapter 14**

Takahashi Yukiko (Nagaoka University of Technology)

**ECO-FRIENDLY ON-SITE WATER ANALYSES FOR ULTRA-TRACE HARMFUL IONS**

HARMFUL IONS IN PUBLIC WATER

WATER QUALITY STANDARDS

CURRENT ANALITICAL METHODS

**ECO-FRIENDLY ON-SITE ANALYSES FOR WATER QUALITY**

**CONCLUSION**

---

**Chapter 15**

Kai Li, Takaomi Kobayashi (Nagaoka University of Technology)

**IONIC LIQUIDS AND POLY(IONIC LIQUID)S USED AS GREEN SOLVENT AND ULTRASOUND RESPONSED MATERIALS**

**INTRODUCTION**

**BACKGROUND**

Polymer/IL composites

Chemical properties of ILs based systems

Green ILs having different counter ions

US responsive ILs systems

Ionic Liquid-Poly(Vinyl Alcohol) Composites response to US Stimuli

**CONCLUSION**
