Emerging Technologies in Intelligent Applications for Image and Video Processing

Part of the Advances in Computational Intelligence and Robotics Book Series

V. Santhi (VIT University, India), D. P. Achariya (VIT University, India) and M. Ezhilarasan (Pondichery Engineering College, India)

Description:

Image and Video Processing is an active area of research due to its potential applications for solving real-world problems. Integrating computational intelligence to analyze and interpret information from image and video technologies is an essential step to processing and applying multimedia data.

Emerging Technologies in Intelligent Applications for Image and Video Processing presents the most current research relating to multimedia technologies including video and image restoration and enhancement as well as algorithms used for image and video compression, indexing and retrieval processes, and security concerns. Features insight from researchers from around the world.

Readers:

This publication is designed for use by engineers, IT specialists, researchers, and graduate level students.

Topics Covered:

- Biometric Authentication
- Evolutionary Algorithms
- Image Restoration
- Image Retrieval Systems
- Machine Learning
- Noise Removal Techniques
- Watermarking

Hardcover + Free E-Book: $235.00
E-Book + Free Hardcover: $235.00

Table of Contents

Foreword
Preface
Acknowledgment

Section 1: Image and Video Enhancement, Restoration, and Segmentations

Chapter 1
Image and Video Restoration and Enhancement via Sparse Representation
Li-Wei Kang, Chia-Mu Yu, Chih-Yang Lin and Chia-Hung Yeh

Chapter 2
An Efficient Method for Optimizing Segmentation Parameters
Jacob D’Avy, Wei-Wen Hsu, Chung-Hao Chen, Andreas Koschan and Mongi Abidi

Chapter 3
Study of Different Noise Removal Techniques for Digital Images
Punyaban Patel, Bibekananda Jena, Bibhutatta Sahoo, Pritam Patel and Banshidhar Majhi

Chapter 4
Incorporation of Depth in Two Dimensional Video Captures—Review of Current Trends and Techniques
Manami Barthakur and Kandarpa Kumar Sarma

Section 2: Image and Video Compression, Indexing, and Retrieval

Chapter 5
Wavelets with Application in Image Compression
Piyush Kumar Singh, Ravi Shankar Singh and Kabindra Nath Rai

Chapter 6
An Efficient Algorithm for Fast Block Motion Estimation in High Efficiency Video Coding
Ezhilarasan Murugesan, Nirmal Kumar K and Thambidurai P

Chapter 7
Multi-Modal Fusion Schemes for Image Retrieval Systems to Bridge the Semantic Gap
Nidhi Goel and Priti Sehgal

Chapter 8
Indexing of Image Features using Quad tree
Puvirasan and R. Bhavani

Section 3: Image and Video Processing in Public Safety

Chapter 9
Early Recognition of Suspicious Activity for Crime Prevention
Kalaiselvi Geetha Manoharan, Arunnehr J and Geetha A

Chapter 10
Iris Identification System a new Perspective
Poonguzhali N and Ezharasan M

Chapter 11
Object Classification and Tracking in real-time—An overview
Amlan Jyoti Das, Navajit Saikia and Kandarpa Kumar Sarma

Chapter 12
Gait Based Biometric Authentication System with Reduced Search Space
Sudha L.R and Bhavani R

Chapter 13
Lung Disease Classification using A Novel Shape Based Feature Extraction Technique and New Hybrid Genetic Approach: Lung Disease Classification using Shape Based approach
Bhuvaneswari Chandran, P. Aruna and D. Loganathan

Chapter 14
Fingerprint Iris Palmprint Multimodal Biometric Watermarking System Using Genetic Algorithm Based Bacterial Foraging Optimization Algorithm
S. Anil H Nair and P. Aruna

Section 4: Image and Video Classification, Clustering, and Applications

Chapter 15
Color Features and Color Spaces Applications to the Automatic Image Annotation
Vafa Mahami and Farzin Yaghmae

Chapter 16
Biomedical Imaging Techniques
Shanmuga Sundari Ilangovan, Bishwanath Mahanty and Shampa Sen

Chapter 17
A new EYENET model for Diagnosis of Age-Related Macular Degeneration: Diagnosis of Age-Related Macular Degeneration
Priya Kandan and P. Aruna

Chapter 18
Automatic Detection and Classification of Ischemic Stroke Using K-Means Clustering and Texture Features
N HemaRajini and R Bhavani

V. Santhi has received her Ph.D. in Computer Science and Engineering from VIT University, Vellore, India. She has pursued her M.Tech. in Computer Science and Engineering from Pondicherry University, Puducherry. She has received her B.E. in Computer Science and Engineering from Bharathidasan University, Trichy, India. Currently she is working as an Associate Professor in the School of Computing Science and Engineering, VIT University, Vellore, India. She has authored many national and international journal papers and one book. She is currently in the process of editing two books. Also, she has published many chapters in different books published by International publishers. She is senior member of IEEE and she is holding membership in many professional bodies like CSI, ISTE, IACSIT, IEEE and IAENG. Her areas of research include Image Processing, Digital Signal Processing, Digital Watermarking, Data Compression and Computational Intelligence.

M. Ezhilarasan was born on May 30, 1968. He has obtained Bachelor of Technology in Computer Science and Engineering, Master of Technology in Computer Science and Engineering and Ph. D. in Computer Science and Engineering from Pondicherry University in 1990, 1996 and 2007 respectively. He is a Professor of the Department of Information Technology, Pondicherry Engineering College, Puducherry, India. He is a life member of Indian Society for Technical Education (ISTE). He has published 60 papers in National and International Conference Proceedings and Journals. His research interests include Multimedia Data Compression and Multi-Biometrics.
