Foreword

Preface

Acknowledgment

Section 1 - THREE-DIMENSIONAL VIRTUAL LEARNING ENVIRONMENTS

Chapter 1
Contributions of Collaborative and Immersive Environments in Development a Remote Access Laboratory: From Point of View of Effectiveness in Learning
   Prof. Ronald Zamora, Universidad de la Costa, CO
   Dr. Jeimy Vélez, Universidad Pontificia Bolivariana, CO
   Dr. Jose L. Villa, Universidad Tecnológica de Bolivar Universidad Tecnologica de Bolivar, CO

Chapter 2
Virtual Laboratories Development using 3D Environments
   Toni Amorim Oliveira, Universidade Estadual do mato Grosso, BR
   Prof. Norian Marranghello, Unesp/Ibilce, BR
   Prof. Alexandre César Rodrigues Silva, FEIS/Unesp, BR
   Dr. Aledir Silveira Pereira, Unesp/Ibilce, BR

Chapter 3
3D Virtual Learning Environments: An Avatar-Based Virtual Classes Platform
   Tiago Cinto, University of Campinas - UNICAMP, BR
   Harlei Miguel de Arruda Leite, UFOP, BR
   Sarah Negreiros Carvalho, Federal University of Ouro Preto, BR
   Cecilia Sosa Arias Peixoto, UNISAL, BR
   Dalton Soares Arantes, UNICAMP, BR

Chapter 4
Personalisation of 3D Virtual Spaces for Enhanced Ubiquitous Learning
   Dr. Noha Saleeb, Middlesex University, Research GrOup On Development of Intelligent EnvironmentS (GOODIES), GB
   Dr. Georgios Dafoulas, Middlesex University, Research GrOup On Development of Intelligent EnvironmentS (GOODIES), GB
   Prof. Martin Loomes, Middlesex University, Research GrOup On Development of Intelligent EnvironmentS (GOODIES), GB

Chapter 5
Architectures for 3D Virtual Environments
Chapter 6
Designing educational paths in virtual worlds for a successful hands-on learning: Cultural scenarios in NetConnect project
Assunta Tavernise, Università della Calabria Dipartimento di Fisica, Università della Calabria, IT
Francesca Bertacchini, Università della Calabria, IT

Chapter 7
Reviewing the Effectiveness and Learning Outcomes of a 3D Virtual Museum: A Pilot Study
Greg Jones, University of North Texas, US
Adriana D Alba, University of West Georgia, US

Chapter 8
Training Infrastructure to Participate in Real Life Institutions: Learning Through Virtual Worlds
Dr. Pablo Almajano, University of Barcelona, ES
Dr. Maite Lopez-Sanchez, Universitat de Barcelona, ES
Dr. Inmaculada Rodriguez, Universitat de Barcelona, ES
Dr. Anna Puig, Universitat de Barcelona, ES
Dr. Maria Salamó Llorente, Universitat de Barcelona, ES
Dr. Mireia Ribera, Universitat de Barcelona, ES

Chapter 9
Impact Assessment of Affective Virtual Characters in a Virtual Environment
Prof. Tiago Vinícius Ficagna, UNIVALI, BR
Dr. André Raabe, UNIVALI, BR

Chapter 10
Exploring 3D Immersive and Interactive Technology for Designing Educational Learning Experiences
Dr. Min Liu, The University of Texas at Austin, US
Simon Su, Texas Advanced Computing Center, US
Ms. Sa Liu, The University of Texas at Austin, US
Mr. Jason Harron, The University of Texas at Austin, US
Ms. Cynda Fickert, The University of Texas at Austin, US
Bill Sherman, Indiana University, US

Chapter 11
Faculty Adoption of 3D Avatar-Based Virtual World Learning Environments: An Exploratory Case Study
Dr. Susan Dass, ICF International, US
Dr. Nada Dabbagh, George Mason University, US
Chapter 12

Survey of students’ perception and the influence of learning style preferences on learner’s intention to use 3D visualization instruction: Learning style and 3D visualization instruction

Yu-Hsin Hung, National Taiwan University, TW
Ray I Chang, National Taiwan University, TW
Chun Fu Lin, National Taiwan University, TW

Section 2 - EDUCATIONAL HYPERMEDIA AND UBIQUITOUS LEARNING: FUTURE TRENDS

Chapter 13
Memory, Cognition and Multimedia. Role of the importance of organizing knowledge in memory with hypermedia help and online co-understanding systems

Dr. Dorsaf Ben Ismail Ben Romdhane, l'Université virtuelle de Tunis, TN
Prof. Mohammed Yousef ALKHATIB, Al albayt University, JO
Prof. Denis LEGROS, Université Paris 8, FR

Chapter 14
Effects of studying tasks compatibility with tablets on their acceptance: How experienced tasks with tablets can modify perceptions of tablets

Dr. Franck AMADIEU, CLLE research Institute, University of Toulouse, FR
Mr. Charly Pecoste, CLLE research Institute, University of Toulouse, FR
Prof. Claudette Mariné, CLLE research Institute, University of Toulouse, FR
Prof. Cécile van de Leemput, Université libre de Bruxelles, BE
Mr. Colin Lescarret, CLLE research Institute, University of Toulouse, FR

Chapter 15
The Role of Pedagogical Agents on Learning: Issues and Trends

Michelle Taub, North Carolina State University, US
Seth A. Martin, North Carolina State University, US
Dr. Roger Azevedo, North Carolina State University, US
Nicholas V. Mudrick, North Carolina State University, US

Chapter 16
Enhancing the Effectiveness of Educational Hypermedia: A Cognitive Load Approach

Dr. Anne-Marie Singh, University of New South Wales School of Education UNSW Sydney, AU
Prof. Slava Kalyuga, University of New South Wales School of Education UNSW Sydney, AU

Chapter 17
A Perspective about the Application of Quality of Context in U-Learning Environments

Ms. Felipe Becker Nunes, Federal University of Rio Grande do Sul, BR
Ms. Fabricio Herpich, Federal University of Rio Grande do Sul, BR
Ms. Gleizer Bierhalz Voss, Federal Institute of Education Science and Technology Farroupilha, BR
Roseclea Duarte Medina, Federal University of Santa Maria, BR
Chapter 18
Examining the Effectiveness of Hyperaudio Learning Environments

Prof. Joerg Zumbach, Paris Lodron University of Salzburg, AT
Dr. Stephanie Moser, Paris Lodron University of Salzburg, AT

Chapter 19
Content Personalized Recommendation Engine to Support an Informal Learning Environment in the Health Context

Mr. Alisson Alan Lima da Costa, Rural Federal University of Semi-Arid, BR
Prof. Francisco Milton Mendes Neto, Rural Federal University of Semi-Arid, BR
Mr. Enio Lopes Sombra, Rural Federal University of Semi-Arid, BR
Mr. Jonathan Darlan Cunegundes Moreira, Rural Federal University of Semi-Arid, BR
Mr. Rafael Castro de Souza, Rural Federal University of Semi-Arid, BR
Mr. Jerffeson Gomes Dutra, Rural Federal University of Semi-Arid, BR

Chapter 20
Systems Engineering Concepts with Aid of Virtual Worlds and Open Source Software: Using Technology to Develop Learning Objects and Simulation Environments

Ms. Latina Davis, Morgan State University, US
Dr. Maurice Dawson, University of Missouri-St. Louis, US
Dr. Marwan Omar, Saint Leo University, US

Chapter 21
Three-Dimensional Virtual Environment and NPC: A Perspective About Intelligent Agents Ubiquitous

Ms. Fabrício Herpich, Federal University of Rio Grande do Sul, BR
Ms. Felipe Becker Nunes, Federal University of Rio Grande do Sul, BR
Ms. Gleizer Bierhalz Voss, Federal Institute of Education Science and Technology Farroupilha, BR
Dr. Roseclea Duarte Medina, Federal University of Santa Maria, BR

Chapter 22
An extended acceptance model for Augmented Reality educational applications

Dr. Alexandru Balog, National Institute for Research and Development in Informatics, RO
Dr. Costin Pribeanu, National Institute for Research and Development in Informatics, RO

Chapter 23
A Three-Dimensional Environment of Personalized Recommendation of Learning Objects to Support Ubiquitous Learning

Mr. Rodrigo Valença Cavalcante Frade, Rural Federal University of Semi-Arid, BR
Dr. Francisco Milton Mendes Neto, Rural Federal University of Semi-Arid, BR
Mr. Rafael Castro de Souza, Rural Federal University of Semi-Arid, BR
