Sustainable Local Energy Planning and Decision Making: Emerging Research and Opportunities

Part of the Practice, Progress, and Proficiency in Sustainability Book Series

Vangelis Marinakis (National Technical University of Athens, Greece)

Description:

It is imperative to promote and maintain sustainability in all areas of the world. By developing effective energy usage frameworks, regional communities can better achieve this goal.

Sustainable Local Energy Planning and Decision Making: Emerging Research and Opportunities is an authoritative reference source featuring the latest scholarly research on an operational framework for decision support for local and regional authorities to aid in sustainable energy planning. Including extensive coverage on a broad range of topics and perspectives such as emission trends, energy balance, and climate change, this book is ideally designed for academicians, researchers, and students seeking current research on the development of regional sustainable energy plans.

Topics Covered:

- Climate Change
- Emission Trends
- Energy Balance
- Information Systems
- Multi-Criteria Analysis
- Municipality
- Robustness Analysis

Hardcover: $140.00
E-Book: $140.00
Hardcover + E-Book: $165.00
