Design Solutions for User-Centric Information Systems

Part of the Advances in Human and Social Aspects of Technology Book Series

Saqib Saeed (University of Dammam, Saudi Arabia), Yasser A. Bamarouf (University of Dammam, Saudi Arabia), T. Ramayah (University Sains Malaysia, Malaysia) and Zafar Iqbal (University of Dammam, Saudi Arabia)

Description:
Continuous improvements in technological applications have allowed more opportunities to develop systems with user-focused designs. This not only leads to higher success in day-to-day usage, but it increases the overall probability of technology adoption.

**Design Solutions for User-Centric Information Systems** provides a comprehensive examination of the latest strategies and methods for creating technological systems with end users as the focal point of the design process. Highlights innovative practices and applications across a variety of areas, such as cloud-based computing services, e-government adoption, and logistics evaluation.

Readers:
This book is an ideal reference source for computer engineers, practitioners, project managers, graduate students, and researchers interested in the enhancement of user-centric information system development.

Topics Covered:
- Cloud-Based Computing Services
- Digital Retail
- E-Government Adoption
- Logistics Evaluation
- Personal Finance Management
- User Interface Design
- User Performance Indicator Tools
- Web-Based Information Retrieval Systems

Hardcover + Free E-Book: $215.00  E-Book Only: $215.00

Phone: 717-533-8845 x100  Toll Free: 1-866-342-6657  Fax: 717-533-8661 or 717-533-7115  Online Bookstore: www.igi-global.com
Table of Contents

Preface

Acknowledgment

Section 1: Introduction

Chapter 1
Digital Retail. How Customer-Centric Technology is Reshaping the Industry: IT-Enabled Digital Disruption
Pablo Penas Franco, Syracuse University, Spain

Chapter 2
Digitalization of death certification model – transformation issues and implementation concerns
Dalibor Stanimirovic, University of Ljubljana, Slovenia

Chapter 3
E-Government adoption in Nigeria, the journey so far: The end of corruption
Sola Oni, Pan Atlantic University, Nigeria

Chapter 4
Freight Transport and Logistics Evaluation Using Entropy Technique Integrated to TOPSIS Algorithm
Mohammad Anwar Rahman, Central Connecticut State University, USA

Chapter 5
A multifactorial analysis of the acceptance of Recommender System for Saudi Universities the literature revisited
Hadeel Alharbi and Kamaljeet Sandhu, University of New England, Australia

Chapter 6
A Proposed Framework factors of the acceptance of recommender systems in e learning for Saudi universities
Hadeel Alharbi and Kamaljeet Sandhu, University of New England, Australia

Chapter 7
Outsourcing to Cloud-based Computing Services in Higher Education in Saudi Arabia
Athary Alwasel, Ben Clegg and Andreas Schroeder, Aston University, UK

Section 2: User Centered Design

Chapter 8
Design Solutions guided by user behavior: A Practical Inquiry Approach
Mariam Ahmed Elhussein, University of Dammam, KSA

Chapter 9
Mitigating Ethno-cultural Differences: Ethical Guidelines for ICT Development in an Indigenous Community
Hasnain Falak and Tariq Zaman, Universiti Malaysia Sarawak, Malaysia

Chapter 10
User Interface Design in Isolation from Underlying Code and Environment

Section 3: Usability Engineering

Chapter 11
Web Caching System: Improving the Performance of Web based information Retrieval System
Sathiyaamoothi V, Sona College of Technology, India

Chapter 12
User Performance Testing Indicator: User Performance Indicator Tool (UPIT)
Imuetinyan Bernadette Iyawe, University of Benin, Nigeria

Chapter 13
Development of Ambient Assisted Living Products and Services: The Role of International Classification of Functioning, Disability and Health
Ana Isabel Martins, Alexandra Queirós and Nelson Pacheco Rocha, University of Aveiro, Portugal

Chapter 14
Modelling cyber-crime protection behaviour among computer users in the context of Bangladesh
Imran Mahmud, T Ramayah, Md. Mahedi Hasan Nayeem, S.M. Muzahidul Islam, Pei Leng Gan, Universiti Sains Malaysia, Malaysia

Section 4: Compilation of References

About the Contributors

Index
**Saqib Saeed** is an assistant professor at the Computer Information System department at University of Dammam, KSA. He has a Ph.D. in Information Systems from University of Siegen, Germany, and a Masters degree in Software Technology from Stuttgart University of Applied Sciences, Germany. He is also a certified software quality engineer from American Society of Quality. His research interests lie in the areas of human-centered computing, computer supported cooperative work, empirical software engineering and ICT4D. He has more than 50 publications to his credit.

**T. Ramayah** has an MBA from Universiti Sains Malaysia (USM). Currently he is a Professor at the School of Management in USM. He teaches mainly courses in Research Methodology and Business Statistics. Apart from teaching, he is an avid researcher, especially in the areas of technology management and adoption in business and education. His publications have appeared in Computers in Human Behavior, Resources Conservation and Recycling, Journal of Educational Technology & Society, Direct Marketing: An International Journal, Information Development, Journal of Project Management (JoPM), Management Research News (MRN), International Journal of Information Management, International Journal of Services and Operations Management (IJSOM), Engineering, Construction and Architectural Management (ECAM) and North American Journal of Psychology. He is constantly invited to serve on the editorial boards and program committees of many international journals and conferences of repute. His profile can be accessed from http://www.ramayah.com.
