Green Supply Chain Management for Sustainable Business Practice

Part of the Advances in Logistics, Operations, and Management Science Book Series

Mehmood Khan (Abu Dhabi University, UAE), Matloub Hussain (Abu Dhabi University, UAE) and Mian M. Ajmal (Abu Dhabi University, UAE)

Description:

The issue of sustainability has become a vital discussion in many industries within the public and private sectors. In the business realm, incorporating such practices allows organizations to re-design their operations more effectively.

Green Supply Chain Management for Sustainable Business Practice examines the challenges and benefits of implementing sustainability into the core functions of contemporary enterprises, focusing on how green approaches improve operations in an ecological way. Highlights key concepts, emerging innovations, and future directions.

Readers:

This book is a pivotal reference source for professionals, managers, educators, and upper-level students.

Topics Covered:

- Environmental Awareness
- Lean Manufacturing
- Management Models
- Non-Financial Performance Measures
- Performance Measurement
- Sourcing and Logistics
- Waste Elimination
