Although organizational decision-making can be very complex, the understanding of technology applications is significant in not only determining the usefulness of virtual groups in organizations, but also in the designing of electronic collaborative activities.

Collaborative Communication Processes and Decision Making in Organizations focuses on the role of technology in organizational decision-making processes and activities, providing academics and management teams with current research in the field of virtual teams in organizations. This publication is an essential resource for instructors and students of organization and group communication, and institutions that have networks of offices and employees in multiple geographical locations.

Topics Covered:
- Best E-Collaborative Practices
- Critical Thinking
- Electronic Collaborative Technologies
- Problem Identification
- Technology in Decision-Making
- Virtual Teams

Market: This premier publication is essential for all academic and research library reference collections. It is a crucial tool for academicians, researchers, and practitioners. Ideal for classroom use.
