Research Paradigms and Contemporary Perspectives on Human-Technology Interaction

Part of the Advances in Human and Social Aspects of Technology Book Series

Anabela Mesquita (School of Accounting and Administration of Porto, Polytechnic Institute of Porto, Portugal)

Description:

The integration of technology in modern society has created a deeper connectivity between people around the globe, as well as provided ample opportunity for the exchange of knowledge and ideas. These interactions allow greater opportunities for developments in research and innovation.

Research Paradigms and Contemporary Perspectives on Human-Technology Interaction presents comprehensive coverage on the application of information technology and systems on daily activities and examines its impacts at an interdisciplinary level. Highlights numerous insights into relevant areas such as e-government, web accessibility, and social media.

Readers:

This book is an ideal reference source for academics, professionals, practitioners, graduate students, and researchers seeking material on the relationship between humans and emerging technologies in modern society.

Topics Covered:

- E-Government
- E-Learning
- Gender Considerations
- Mobile Technologies
- Online Reputation
- Social Media
