Technology-Driven Productivity Improvements and the Future of Work: Emerging Research and Opportunities

Part of the Advances in Business Strategy and Competitive Advantage Book Series

Göran Roos (University of Adelaide, Australia)

Description:

While technological developments are evolving at a rapid pace, employee workplace skills are falling behind. This rate of change will continue to accelerate, and it is the responsibility of businesses to provide their employees with a solid foundation for keeping pace with the technology surrounding them.

Technology-Driven Productivity Improvements and the Future of Work: Emerging Research and Opportunities provides a comprehensive discussion of the latest strategies and methods for creating harmony between the workplace population and their technological environments. Featuring coverage on relevant topics such as STEM skills, economic complexities, and social programs, this is an informative resource for all business owners, professionals, practitioners, and researchers who are interested in discovering new methods that will enable humans and technology to work together.
