Advancing the Next-Generation of Mobile Computing: Emerging Technologies

Ismail Khalili (Johannes Kepler University Linz, Austria) and Edgar R. Weippl (Secure Business Austria, Austria)

The growth of mobile technology has caused considerable changes in the way we interact with one another within both personal and business environments. Advancements in mobile computing and mobile multimedia resonate with engineers, strategists, developers, and managers while also determining the behavior and interaction of end users.

Advancing the Next-Generation of Mobile Computing: Emerging Technologies offers historical perspectives on mobile computing, as well as new frameworks and methodologies for mobile networks, intelligent mobile applications, and mobile computing applications. This collection of research aims to inform researchers, designers, and users of mobile technology and promote awareness of new trends and tools in this growing field of study.

Topics Covered:
- Intelligent Mobile Advertising
- IP-Based Mobile Networks
- Mobile Clients
- Mobile Computing Applications
- Mobility Management Schemes
- Multimedia Streaming
- Routing Protocols
- Security Management for Mobile Ad Hoc Networks
- WiMAX Systems
- Wireless Sensor Networks

Market: This premier publication is essential for all academic and research library reference collections. It is a crucial tool for academicians, researchers, and practitioners and is ideal for classroom use.

Ismail Khalili (http://www.iiwas.org/ismail/) is a senior researcher and lecturer at the Institute of Telecooperation, Johannes Kepler University Linz, Austria, since October 2002. He is the president of the international organization of Information Integration and Web-based Applications & Services (@WAS). He holds a PhD in computer engineering and received his habilitation degree in applied computer science on his work on agents' interaction in ubiquitous environments in May 2008. He currently teaches, consults, and conducts research in Mobile Multimedia, Cloud Computing, Agent Technologies, and the Semantic Web and is also interested in the broader business, social, and policy implications associated with the emerging information technologies. Before joining Johannes Kepler University of Linz, he was a research fellow at the Intelligent Systems Group at Utrecht University, Netherlands from 2001-2002 and the project manager of AgenCom project at the Software Competence Center Hagenberg - Austria from 2000-2001. Dr. Khalili has authored around 100 scientific publications, books, and book chapters. He is the editor of the Handbook of Research on Mobile Multimedia series, the book Mobile Multimedia Communication Engineering Perspectives, the book Multimedia Transcending in Mobile and Wireless Networks, the book Innovations in Mobile Multimedia Communications and Applications: New Technologies and the book Advancing the Next-Generation of Mobile Computing: Emerging Technologies. He serves as the Editor-in-Chief of the International Journal on Web Information Systems (IJWIS), International Journal on Pervasive Computing and Communication (IJPCCC) both published by Emerald Group publishing, UK, Journal of Mobile Multimedia (JMM) published by Rinton Press, USA, International Journal of Mobile Computing and Multimedia Communication (JMCMC) published by IGI Global, USA, Advances in Next Generation Mobile Multimedia book series published by IGI Global, USA, and Atlantic Ambient and Pervasive Intelligence book series published by Atlantis and Springer. He is on the editorial board of several international journals. His work has been published and presented at various conferences and workshops.

Print: US $190.00  |  Perpetual: US $285.00  |  Print + Perpetual: US $380.00

Publishing Academic Excellence at the Pace of Technology Since 1988
Section 1: Ad Hoc Networks

Chapter 1
Security Management for Mobile Ad Hoc Network of Networks (MANoN)
Ali H. Al-Bayatti (De Montfort University, UK)
Hussein Zedan (De Montfort University, UK)
Antoniuo Cau (De Montfort University, UK)
Siewe François (De Montfort University, UK)

Chapter 2
A Probabilistic Routing Protocol in VANET
Yan Gongjun (Indiana University Kokomo, USA)
Stephan Olariu (Old Dominion University, USA)
Shaharuddin Salleh (Universiti Teknologi Malaysia, Malaysia)

Chapter 3
An Inter-Domain Agent Based Secure Authorization and Communication for Mobile Clients in Wireless Ad Hoc Networks
Kumar Neeraj (SMVD University, India)
R. B. Patel (MM University, India)

Chapter 4
Improving Throughput of Starved TCP Flow by Sidestepping Bottleneck Nodes Using Concurrent Transmission
Rajesh Verma (MNNIT, India)
Arun Prakash (MNNIT, India)
Rajeev Tripathi (MNNIT, India)
Neesar Tyagi (MNNIT, India)

Chapter 5
Building Wireless Sensor Network Applications with LoaCI
Daniel Hughes (Xi’an Jiaotong-Liverpool University, USA)
Klaus Thoelen (Katholieke Universiteit Leuven, Belgium)
Wouter Hofre (Katholieke Universiteit Leuven, Belgium)
Javier Del Cid (Katholieke Universiteit Leuven, Belgium)
Michiels Sam (Katholieke Universiteit Leuven, Belgium)
Christophe Huygens (Katholieke Universiteit Leuven, Belgium)
Joost J. van Doorn (University of São Paulo, Brazil)

Section 2: Multimedia and Streaming

Chapter 6
Options for WiMAX Uplink Media Streaming
Salah Salah (University of Essex, UK)

Chapter 7
Optimizing Uplink Channel Estimation in WiMAX Systems
Yushi Shen (Microsoft, USA)
Laurence Mihrein (University of California, San Diego, USA)
Edward Martinez (Freescale Semiconductor Inc., USA)

Chapter 8
Quality of Experience Models for Multimedia Streaming
Vladio Menkovski (Eindhoven University of Technology, The Netherlands)
Georgos Exarchakos (Eindhoven University of Technology, The Netherlands)
Nico Lison (Eindhoven University of Technology, The Netherlands)
Antonio Vázquez (Telefonica R&D, Spain)

Chapter 9
Utilization of an Improvements Manual Configuration for Multimedia in 6to4 Tunneling
Abdellah Jamali (INPT and FSTM, Morocco)
Najib Naja (INPT, Morocco)
Ouaam Saad (INPT, Morocco)

Chapter 10
A Proposal Intelligent Denoising Technique for Spatial Video Denoising for Real-Time Applications
Amany Sarhan (Mansoura University, Egypt)
Mohamed Faheem (Tanta University, Egypt)
Orban Mahmoud (Nile Institute of Commerce & Computer Technology, Egypt)

Section 3: Mobile Technologies

Chapter 11
Automatic Speaker Localization and Tracking
Slah Omair (USTHB University, Algeria)
Abdellah Jamali (USTHB University, Algeria)

Chapter 12
Extended Mobile IPv6 Route Optimization for Mobile Networks in Local and Global Mobility Domain
Arun Prakash (Motilal Nehru National Institute of Technology, India)
Rajesh Verma (Motilal Nehru National Institute of Technology, India)
Tripathi Rajeev (Motilal Nehru National Institute of Technology, India)
Khidir Naif (University of Waterloo, Canada)

Chapter 13
Network Layer Mobility Management Schemes for IP-Based Mobile Networks
Paramesh Upadhyay (Sant Longowal Institute of Engineering & Technology, India)
Sudarshan Tiwari (Motilal Nehru National Institute of Technology, India)

Chapter 14
A CASE Tool for Java Mobile Computing Applications
Ioannis T. Christou (Athens Information Technology, Greece)
Sofoklis Efremidis (Athens Information Technology, Greece)
Aikaterini Roukounaki (Athens Information Technology, Greece)

Section 4: Privacy

Chapter 15
Pertinent Prosodic Features for Speaker Identification by Voice
Himil Sayoud (USTHB University, Algeria)
Slah Omair (USTHB University, Algeria)

Chapter 16
A Memorizing Algorithm
Quynh Chi Truong (National University of Ho Chi Minh City, Vietnam)
Anh Tuan Truong (National University of Ho Chi Minh City, Vietnam)
Dang Tran Khanh (National University of Ho Chi Minh City, Vietnam)

Chapter 17
Building an Intelligent Mobile Advertising System
Jerry Zeyu Gao (San Jose State University, USA)
Angela Ji (Accenture Software, USA)
