Ioannis Minis (University of the Aegean, Greece), Vasileios Zeimpekis (University of the Aegean, Greece), Georgios Dounias (University of the Aegean, Greece) and Nicholas Ampazis (University of the Aegean, Greece)

Computational Intelligence (CI) is a term corresponding to a new generation of algorithmic methodologies in artificial intelligence, which combines elements of learning, adaptation, evolution and approximate (fuzzy) reasoning to create programs that can be considered intelligent.

Supply Chain Optimization, Design, and Management: Advances and Intelligent Methods presents computational intelligence methods for addressing supply chain issues. Emphasis is given to techniques that provide effective solutions to complex supply chain problems and exhibit superior performance to other methods of operations research.

Topics Covered:

• Defining Optimum Service Levels and Inventory Costs
• Demand Forecasting
• Distribution Channel Management
• Forecasting, Sales and Customer Service
• Just in Time Productivity
• Procurement and Inventory Management
• Production Planning and Scheduling
• Production Scheduling
• Sales Management
• Warehousing, Transportation and Distribution Management

Market: This premier publication is essential for all academic and research library reference collections. It is a crucial tool for academicians, researchers, and practitioners and is ideal for classroom use.

Ioannis Minis is a Professor in the Department of Financial and Management Engineering of the University of Aegean. He conducts research in design, production, and operations systems, including supply chain management. Dr. Minis holds a Ph.D. degree from the University of Maryland in Mechanical Engineering and has held the positions of Assistant and Associate Professor of Mechanical Engineering at the same University (1988-1997). He is conducting research in Operations for over 20 years and has authored two edited volumes, several book chapters, over 45 journal articles, and over 60 articles in conference proceedings. Dr. Minis has been the recipient of the 1993 Earl E. Walker Outstanding Young Manufacturing Engineer Award from the Society of Manufacturing Engineers (SME).
Section 1: Synthesis and Design of Supply Chain

Chapter 1
Nature-Inspired Intelligence in Supply Chain Management:
Vassiladis Vassilios (University of the Aegean, Greece)
Dounias Giorgos (University of the Aegean, Greece)

Chapter 2
Coalitional Added Services in a Linear Neutral e-Marketplace:
Renna Paolo (University of Basilicata, Italy)
Argoneto Pierluigi (University of Basilicata, Italy)

Chapter 3
Investing in Excess Capacity:
Argoneto Pierluigi (University of Basilicata, Italy)
Renna Paolo (University of Basilicata, Italy)

Chapter 4
Optimal Design and Operation of Supply Chain Networks under Demand Uncertainty:
Georgiadis Michael C. (University of Western Macedonia, Greece)
Longinidis Pantelis (University of Western Macedonia, Greece)

Section 2: Planning in Large Supply Chains

Chapter 5
A Computational Intelligence Approach to Supply Chain Demand Forecasting:
Ampazis Nicholas (University of the Aegean, Greece)

Chapter 6
Generating Supply Chain Ordering Policies using Quantum Inspired Genetic Algorithms and Grammatical Evolution:
McGarraghy Seán (University College Dublin, Ireland)
Phelan Michael (University College Dublin, Ireland)

Chapter 7
Quantitative Risk Management Models for Newsvendor Supply Chains:
Vlachos Dimitrios (Aristotle University of Thessaloniki, Greece)

Chapter 8
Relief Distribution Networks:
Ichoua Soumia (Johnson C. Smith University, USA)

Section 3: Supply Chain Operations

Chapter 9
An Analytical Model to Estimate the Optimum Production Rate of Picking Processes in a Modular Warehouse Environment:
Emiris Dimitrios M. (University of Piraeus, Greece)
Skarlatos Athanasios (University of Piraeus, Greece)

Chapter 10
Constrained Optimization of JIT Manufacturing Systems with Hybrid Genetic Algorithm:
Xanthopoulos Alexandros (Democritus University of Thrace, Greece)
Koulouzotis Dimitrios E. (Democritus University of Thrace, Greece)

Chapter 11
Multi-period Routing in Hybrid Courier Operations:
Athanassopoulos Theodore (University of the Aegean, Greece)
Minis Ioannis (University of the Aegean, Greece)

Chapter 12
Dynamic Travel Time Estimation Techniques for Urban Freight Transportation Networks Using Historical and Real-Time Data:
Zeimpekis Vasileios (University of the Aegean, Greece)
