Developing and Utilizing E-Learning Applications

Fotis Lazarinis (University of Teesside, UK), Steve Green (University of Teesside, UK) and Elaine Pearson (University of Teesside, UK)

The tools and technologies used and studied in an e-learning context are continually changing due to advancements in both teaching and learning.

Developing and Utilizing E-Learning Applications provides a complete investigation of new methods, technologies, and practices critical to modern educational environments. Exploring topics such as virtual worlds, learning methods, and ICTs as well as interoperability in e-learning environments, this reference provides essential knowledge for educators, practitioners, and students alike.

Topics Covered:
- E-learning strategies in universities
- E-learning teaching standards
- Interaction in online learning
- Interoperable formal and informal learning environments
- Learning in virtual worlds
- Learning methods in entrepreneurial teaching
- Lifelong learning
- Online learning management
- Remote mobile robots
- Usability of interoperable educational tools

Market: This premier publication is essential for all academic and research library reference collections. It is a crucial tool for academicians, researchers, and practitioners and is ideal for classroom use.
