The International Journal of Business Intelligence Research (IJBIR) is a peer-reviewed publication dedicated to exchanging the latest academic research and practical findings on all aspects of managing business intelligence in organizations. IJBIR serves to improve the role, scope, and impact of BI on decision making and to provide a mechanism for sharing research to a global audience. This journal publishes original research and case studies by academic, business, and government contributors on strategies, tools, techniques, and technologies for business intelligence. Providing a global forum for the investigation and reporting of diverse aspects and issues that affect business intelligence, IJIBIR targets researchers, practitioners, academicians, knowledge management researchers, and other industry-related experts. The journal examines all aspects of the business intelligence discipline, including organizational issues, technological developments, educational issues, and analytical techniques that foster or inhibit evidence-based decision-making in organizations. This journal provides a global forum for the investigation and reporting of diverse aspects and issues that affect business intelligence. IJIBIR promotes submissions from all regions of the world that address the theories and practices that impact the field of business intelligence.
