Information and communication technologies are directly influencing the way human beings are engaging themselves in their routine activities. The governance including socio-economic environment needs a catalyst for social change for human development. Currently, technologies are required to play the role of a catalyst to bring this social change for human development. IJICTHD will compile theoretical and empirical works that significantly contribute to the still unexplored field of how ICTs can make a difference in the lives of human beings and contribute to human development.

Topics Covered:
- ICTs and citizen participation
- ICTs and commerce
- ICTs and culture
- ICTs and education
- ICTs and ethics
- ICTs and gender equality
- ICTs and governance
- ICTs and health
- ICTs and Human Empowerment
- ICTs and human rights
- ICTs and international cooperation
- ICTs and political development
- ICTs and poverty alleviation
- ICTs and rural development
- ICTs and Social Change
- ICTs and social media
- ICTs and social networks
- ICTs and socio-economic development
- ICTs and the environment
- ICTs and urban development
- Knowledge for human development
- Policy making with regard to ICTs for development
