Value Relevance of Accounting Information in Capital Markets

Part of the Advances in Finance, Accounting, and Economics Book Series

Marianne Ojo (George Mason University, USA) and Jeanette Van Akkeren (QUT School of Accountancy, Australia)

Description:

Among banking industries and insurance and security sectors, systemic risk and information uncertainty can generate negative consequences. By developing solutions to address such issues, financial regulation initiatives can be optimized.

Value Relevance of Accounting Information in Capital Markets is an essential reference source for the latest scholarly research on the importance of information asymmetries and uncertainties and their effects on the overall regulation of financial industries. Features extensive coverage on a wide range of perspectives, such as financial reporting standards, investor confidence, and capital flows.

Readers:

This publication is ideally designed for professionals, accountants, and academics seeking current research on the effects of the underlying elements in investing.

ISBN: 9781522519003
