The emergence of mechatronics has advanced the engineering disciplines, producing a plethora of useful technical systems.

Advanced Engineering and Computational Methodologies for Intelligent Mechatronics and Robotics presents the latest innovations and technologies in the fields of mechatronics and robotics. These innovations are applied to a wide range of applications for robotic-assisted manufacturing, complex systems, and many more. This publication is essential to bridge the gap between theory and practice for researchers, engineers, and practitioners from academia to government.

Topics Covered:
- Autonomous Systems
- Control Systems
- Intelligent Sensing
- Manufacturing Methodologies
- Mechanisms
- Mechatronic Systems
- Medical Robotics

Market: This premier publication is essential for all academic and research library reference collections. It is a crucial tool for academicians, researchers, and practitioners. Ideal for classroom use
Chapter 1
Open Loop Force Control of Piezo-Actuated Stick-Slip Drives
Edeler Christoph (University of Oldenburg, Germany)
Fatikow Sergej (University of Oldenburg, Germany)

Chapter 2
Optimal Robot Path Planning with Cellular Neural Network
Zhong Yongmin (Curtin University of Technology, Australia)
Shirinzadeh Bijan (Monash University, Australia)
Yuan Xiaobu (University of Windsor, Canada)

Chapter 3
Impedance Control of a Spherical Parallel Platform
Carbonari Luca (Politecnico di Milano, Italy)
Bruzzone Luca (University of Genova, Italy)
Callegari Massimo (Politecnico di Milano, Italy)

Chapter 4
Stiffness Modeling and Analysis of a Six-Bar Parallelogram in Fully Compliant Parallel Positioning Stage
Jia X. (Tianjin University, China)
Tian Y. (Tianjin University, China)
Zhang D. (Tianjin University, China)
Liu J. (Huazhong University of Science and Technology, China)

Chapter 5
Computation of the Output Torque, Power and Work of the Driving Motor for a Redundant Parallel Manipulator
Zhao Yongjie (Shantou University, China)

Chapter 6
Random Weighting Estimation of One-Sided Confidence Intervals in Discrete Distributions
Shiferaw Dereje (Indian Institute of Technology, India)
Jain Anamika (Graphic Era University, India)

Chapter 7
Dynamic Modeling, Simulation and Velocity Control of a Rocker-Bogie Rover for Space Exploration
Kumar Pushpendra (Indian Institute of Technology Roorkee, India)
Pathak Pushparaj Mani (Indian Institute of Technology Roorkee, India)

Chapter 8
Processing of 3D Unstructured Measurement Data for Reverse Engineering
Zhong Yongmin (RMIT University, Australia)

Chapter 9
Modeling and Simulation of Digital Systems Using Bond Graphs
Habibi Majid (K. N. Toosi University of Technology, Iran)
Novinzadeh Alireza B. (K. N. Toosi University of Technology, Iran)

Chapter 10
Modeling, Simulation and Motion Capture Visualization of a Six-DOF Motion Platform for Micro-Manipulations
Afshin Umar (National University of Sciences & Technology, Islamabad, Pakistan)
Iqbal Javaid (College of Electrical and Mechanical Engineering, Rawalpindi, Pakistan)

Chapter 11
Bond Graph Modeling and Computational Control Analysis of a Rigid-Flexible Space Robot in Work Space
Kumar Amit (Indian Institute of Technology Roorkee, India)
Pathak Pushparaj Mani (Indian Institute of Technology Roorkee, India)
Sukavanam N. (Indian Institute of Technology Roorkee, India)

Chapter 12
Experimental Study of Laser Interferometry Based Motion Tracking of a Pico-Crane-Based Mechanism
Bhagat Umesh (Monash University, Australia)
Tian Yanling (Tsinghua University, China)

Chapter 13
Analysis and Implementation for a Walking Support System for Visually Impaired People
Hossain Eklas (University of Wisconsin-Milwaukee, USA)
Khan Md Raisuddin (International Islamic University Malaysia, Malaysia)
Muhida Riza (International Islamic University Malaysia, Malaysia)

Chapter 14
Which is Better?
Mostafa Kazi (National Sun Yat-sen University, Taiwan)
Innchyn Her (National Sun Yat-sen University, Taiwan)
Jonathan M. Her (National Taiwan University, Taiwan)

Chapter 15
Design and Validation of Force Control Loops for a Parallel Manipulator
Carbone Giuseppe (University of Cassino, Italy)
Villegas Enrique (University of Cassino, Italy)
Cecarelli Marco (University of Cassino, Italy)

Chapter 16
High Performance Control of a Stewart Platform Manipulator Using Sliding Mode Control with Synchronization Error
Shiferaw Dereje (Indian Institute of Technology, India)
Jain Anamika (Graphic Era University, India)

Chapter 17
Kinematics and Dynamics Modeling of a New 4-DOF Cable-Driven Parallel Manipulator
Hadian Hamoon (Isfahan University of Technology, Iran)
Fattah Abbas (University of Delaware, USA)

Chapter 18
Kinematic Isotropic Configuration of Spatial Cable-Driven Parallel Robots
Hadian Hamoon (Isfahan University of Technology, Iran)
Fattah Abbas (University of Delaware, USA)

Chapter 19
Experimental Investigations on the Contour Generation of a Reconfigurable Stewart Platform
Kumar G. Satheesh (Indian Institute of Technology Madras, India)
Nagarajan T. (Universiti Teknologi Petronas (UTP), Malaysia)

Chapter 20
Parallel Architecture Manipulators for Use in Masticatory Studies
Narayan Madusudanan Sathia (University at Buffalo, USA)
Kannan Srikanth (University at Buffalo, USA)
Zhou Xiaobo (University at Buffalo, USA)
Krovi Venkat (University at Buffalo, USA)
