Nanotechnology Applications for Improvements in Energy Efficiency and Environmental Management

Part of the Research Essentials Collection

M. A. Shah (National Institute of Technology, Srinagar, India),
M. A. Bhat (Department of Bio-Medical Engineering, Sathyabama University, India), and J. Paulo Davim (University of Aveiro, Portugal)

As nanoscale research continues to advance, scientists and engineers are developing new applications for many different disciplines, including environmental remediation and energy optimization.

Nanotechnology Applications for Improvements in Energy Efficiency and Environmental Management combines up-to-date research findings and relevant theoretical frameworks on the subject of micro-scale technologies being used to promote environmental sustainability. Highlighting the impacts this technology has on energy production and remediation, this book is an all-inclusive reference source for professionals and researchers interested in understanding the multi-disciplinary applications of nanotechnology and nanoscience.

Topics Covered:
- Biomedical Applications
- Energy Engineering
- Environmental Remediation
- Food Technology
- Microbiology
- Nanomaterials
- Nanoscience
- Nanostructures

Print: US $215.00  |  Perpetual: US $325.00  |  Print + Perpetual: US $430.00

Market: This premier publication is essential for all academic and research library reference collections. It is a crucial tool for academicians, researchers, and practitioners. Ideal for classroom use.

M.A. Shah received his doctorate in Condensed Matter Physics from Jamia Millia Islamia (Central University), New Delhi and graduate from University of Kashmir, joined National Institute of Technology, Srinagar in September 1999 as an Assistant Professor in Physics. Dr. Shah is an author of five books published by internationally reputed publishers. He has more than 50 articles and 100's of conference proceedings in the field of Materials Science. He is actively engaged as reviewer and editor of many scientific journals. Shah is also honoured as a visiting scientist in many prestigious institutions and has worked with the eminent personalities of the world at various places, where he pioneered the fabrication of nanomaterials and received trainings for operation of sophisticated equipments. He has explored versatile technique “Safe way to Nanotechnology” for the synthesis of oxide nanomaterials, though still in progress and practice. Dr. shah is a member of many science academies and societies and his work has been cited by number of scientific reporters as well as scientific media.

Publishing Academic Excellence at the Pace of Technology Since 1988
Enclosed is check payable to IGI Global in US Dollars, drawn on a US-based bank
