Robotic Vision: Technologies for Machine Learning and Vision Applications

Jose Garcia-Rodriguez (University of Alicante) and Miguel A. Cazorla Quevedo (University of Alicante, Spain)

Robotic systems consist of object or scene recognition, vision-based motion control, vision-based mapping, and dense range sensing, and are used for identification and navigation. As these computer vision and robotic connections continue to develop, the benefits of vision technology including savings, improved quality, reliability, safety, and productivity are revealed.

Robotic Vision: Technologies for Machine Learning and Vision Applications is a comprehensive collection which highlights a solid framework for understanding existing work and planning future research. This book includes current research on the fields of robotics, machine vision, image processing and pattern recognition that is important to applying machine vision methods in the real world.

Topics Covered:

- Computer Vision
- Face Recognition
- Human Robot Interaction
- Multi-Component Robotic Systems
- Task Learning for Robots
- Visual Control
- Visual Detection
- Visual Learning in Robots

Print: US $195.00 | Perpetual: US $295.00 | Print + Perpetual: US $390.00
Pre-pub Discount:*
Print: US $185.00 | Perpetual: US $280.00
* Pre-pub price is good through one month after publication date.

Market: This premier publication is essential for all academic and research library reference collections. It is a crucial tool for academicians, researchers, and practitioners and is ideal for classroom use.
Section 1: Computer Vision

Chapter 1
Face Recognition with Active Appearance Model (AAM)
Klvdianos Patrycia Barros de Lima (Université de Bourgogne, France)
Brasil Lourdes Mattos (Universidade de Brasilia (UnB), Brazil)
Melo Jairo Simão Santana (Universidade de Brasilia (UnB), Brazil)

Chapter 2
Uniform Sampling of Rotations for Discrete and Continuous Learning of 2D Shape Models
Pérez-Sala Xavier (Universitat Politècnica de Catalunya, Spain & Computer Vision Center of Barcelona, Spain)
Igual Laura (Universitat Politècnica de Catalunya, Spain & Computer Vision Center of Barcelona, Spain)
Escalera Sergio (Universitat Politècnica de Catalunya, Spain & Computer Vision Center of Barcelona, Spain)
Angelo Cecilio (Universitat Politècnica de Catalunya, Spain)

Section 2: Computer Vision Applications

Chapter 3
Comparative Analysis of Temporal Segmentation Methods of Video Sequences
Savá Calvo Marcelo (University of Alicante, Spain)
Azorín-López Jorge (University of Alicante, Spain)
Fuster-Guilló Andrés (University of Alicante, Spain)

Chapter 4
Security Applications Using Computer Vision
Sasi Sreeja (Gannon University, USA)

Chapter 5
Visual Detection in Linked Multi-Component Robotic Systems
López-Guede José Manuel (Bosque Country University, Spain)
Fernández-Gauna Borja (Bosque Country University, Spain)
Moreno Ramón (Bosque Country University, Spain)
Graña Manuel (Bosque Country University, Spain)

Chapter 6
Building a Multiphase Object Tracking System with Occlusion Handling in Surveillance Videos
Altmomani Raed (Wayne State University, USA)
Dong Ming (Wayne State University, USA)

Chapter 7
A Real-time Color Watershed Transformation and Image Segmentation Defined on RGB Spherical Coordinates
Moreno Ramón (Universidad del País Vasco, Spain)
Graña Manuel (Universidad del País Vasco, Spain)
Maddani Kurosh (Université PARIS-EST Creteil, Senart-FB Institute of Technology, France)

Chapter 8
Computer Vision Applications of Self-Organizing Neural Networks
García-Rodríguez José (University of Alicante, Spain)
García-Chamizo Juan Manuel (University of Alicante, Spain)
Orts-Escalonso Sergio (University of Alicante, Spain)
Morell-Gimenez Vicente (University of Alicante, Spain)
Serra-Pérez José Antonio (University of Alicante, Spain)
Angelolopoulou Ana (University of Westminster, UK)
Pscarou Alexandra (University of Westminster, UK)
Cazorla Miguel (University of Alicante, Spain)
Viejo Diego (University of Alicante, Spain)

Section 3: 3D Computer Vision and Robotics

Chapter 9
A Review of Registration Methods on Mobile Robots
Morrell-Gimenez Vicente (University of Alicante, Spain)
Orts-Escalonso Sergio (University of Alicante, Spain)
García-Rodríguez José (University of Alicante, Spain)
Cazorla Miguel (University of Alicante, Spain)
Viejo Diego (University of Alicante, Spain)

Chapter 10
Methodologies for Evaluating Dignity Estimation Algorithms
Cabezas Ivan (Universidad del Valle, Colombia)
Trujillo Marfa (Universidad del Valle, Colombia)

Chapter 11
Real-Time Structure Estimation in Dynamic Scenes Using a Single Camera
Dari Ashorn P. (University of Florida, USA)
Kam Zhen (University of Florida, USA)
Fisher Nic (University of Florida, USA)
Dixson Warren E. (University of Florida, USA)

Chapter 12
Intelligent Stereo Vision in Autonomous Robot Traversability Estimation
Nalpantidis Lazaros (Royal Institute of Technology – KTH, Sweden)
Kostavelis Ioannis (Democritus University of Thrace, Greece)
Gasteratos Antonios (Democritus University of Thrace, Greece)

Section 4: Social Robotics

Chapter 13
Gesture Learning by Imitation Architecture for a Social Robot
Bandeira J.P. (University of Málaga, Spain)
Rodriguez J.A. (University of Málaga, Spain)
Molina-Tanco L. (University of Málaga, Spain)
Bander A. (University of Málaga, Spain)

Chapter 14
Computer Vision for Learning to Interact Socially with Humans
Ramos-da-Silva Renato (Institute of Mathematics and Computer Science, University of Sao Paulo, Brazil)
Romero Rosell Aparecida Francelin (Institute of Mathematics and Computer Science, University of Sao Paulo, Brazil)

Chapter 15
Learning Robot Vision for Assisted Living
Yan Wenjie (University of Hamborg, Germany)
Torra Elena (Eindhoven University of Technology, The Netherlands)
van der Pol David (Eindhoven University of Technology, The Netherlands)
Meins Nils (University of Hamborg, Germany)
Weber Cornelius (University of Hamborg, Germany)
Guipers Raymond H. (Eindhoven University of Technology, The Netherlands)
Wermter Stefan (University of Hamborg, Germany)

Chapter 16
An Integrated Framework for Robust Human-Robot Interaction
Sridharan Mohan (Texas Tech University, USA)

Section 5: Vision Control

Chapter 17
Collaborative Exploration Based on Simultaneous Localization and Mapping
Paig Domenech (Rovira i Virgili University, Spain)

Chapter 18
An Embedded Vision System for RoboCap
Oliveres P Cavestany (University of Murcia, Spain)
Herrero-Pérez D. (University of Murcia, Spain)
Jiménez J. Alcaraz (University of Murcia, Spain)
Barberá H. Martínez (University of Murcia, Spain)

Chapter 19
Visual Control of an Autonomous Indoor Robotic Bump
Alkundi L. M. (University of Edinburgh, UK)
Fisher R. B. (University of Edinburgh, UK)

Section 6: Visual Attention

Chapter 20
Selective Review of Visual Attention Models
García Juan F. (Universidad de León, Spain)
Rodríguez Francisco J. (Universidad de León, Spain)
Matellán Vicente (Universidad de León, Spain)

Chapter 21
Attractive Visual Memory for Robot Localization
Pedrezo Eduardo (Rey Juan Carlos University, Spain)
Cañas José María (Rey Juan Carlos University, Spain)
