International Journal of Information Security and Privacy (IJISP)

ISSN: 1930-1650; EISSN: 1930-1669
Established 2007; Published Quarterly

Editor(s-in-Chief): Li Yang (University of Tennessee at Chattanooga, USA)

As information technology and the Internet become more and more ubiquitous and pervasive in our daily lives, there is an essential need for a more thorough understanding of information security and privacy issues and concerns. The International Journal of Information Security and Privacy (IJISP) creates and fosters a forum where research in the theory and practice of information security and privacy is advanced. IJISP publishes high quality papers dealing with a wide range of issues, ranging from technical, legal, regulatory, organizational, managerial, cultural, ethical, and human aspects of information security and privacy, through a balanced mix of theoretical and empirical research articles, case studies, book reviews, tutorials, and editorials. This journal encourages submission of manuscripts that present research frameworks, methods, methodologies, theory development and validation, case studies, simulation results and analysis, technological architectures, infrastructure issues in design, and implementation and maintenance of secure and privacy preserving initiatives.

Individual Pricing

Print + Free E-Access: $260.00
E-Access Only: $245.00

Institution Pricing

Print + Free E-Access: $725.00
E-Access Only: $685.00

Topics Covered:

• Agents and mobile communication systems
• Authentication and authorization of users, systems, and applications
• Businesses models and systems with security and privacy requirements and management
• Case studies in security and privacy
• Civil rights and liberties
• Computer worms and viruses
• Consumer and business practices and trends
• Cryptographic techniques and protocols
• Database issues in privacy protection
• Developing enterprise management of security and privacy policies and infrastructures
• Distributed marketplaces, auctions, gaming, and procedures
• Economic impact analysis
• Electronic commerce, banking, payment protocols, encryption, authentication, and access control
• Enhancements for Storage Area Networks
• E-services, eoting, and e-government
• File system security and privacy, including firewall technologies, policies, and trends
• Global issues
• Hacking, corruptions, cyber-terrorism, and intrusion detection
• Identity and privacy confidentiality
• Legal, regulatory, and compliance issues
• Peer-to-Peer computing
• Preserving and enhancing technologies and initiatives
• Relationships and trade-offs between security and privacy
• Trust architectures and underlying infrastructures

SUBMISSION INFORMATION

Researchers and practitioners are invited to submit their original empirical research articles 3,000-5,000 words in length. Interested authors must consult the journal’s guidelines for manuscript submissions at http://www.igi-global.com/publish/contributor-resources/before-you-write/ prior to submission. All submitted articles will be reviewed on a double-blind review basis by no fewer than 3 members of the journal’s Editorial Review Board and 1 Associate Editor. Final decision regarding acceptance/rejection will be based on the reviews received from the reviewers and at the sole discretion of the Editor-in-Chief.

All inquiries should be directed to the attention of:
Li Yang, Li.Yang@utc.edu

All manuscript to UCI.INI should be sent through E-Editorial Discovery:
