Public Information Management and E-Government: Policy and Issues

Mary Maureen Brown (University of North Carolina Charlotte, USA) and G. David Garson (North Carolina State University, USA)

Recently, the public sector has given an increasing amount of national and international attention to electronic government systems. Therefore, it is inevitable that the theoretical implications and intersections between information technology and governmental matters are more widely discussed.

Public Information Management and E-Government: Policy and Issues offers a fresh, comprehensive dialogue on issues that occur between the public management and information technology domains. With its focus on political issues and their effects on the larger public sector, this book is valuable for administrators, researchers, students, and educators who wish to gain foundational and theoretical knowledge on e-government policies.

Topics Covered:
- Electronic Government
- Digital Divide
- Project Management
- Public and Sector Management
- Public Policy Environment
- Organizational Behavior
