Handbook of Research on Innovative Pedagogies and Technologies for Online Learning in Higher Education

Part of the Advances in Higher Education and Professional Development Book Series

Phu Vu (University of Nebraska at Kearney, USA), Scott Fredrickson (University of Nebraska at Kearney, USA) and Carl Moore (University of DC, USA)

Description:

The integration of technology has become an integral part of the educational environment. By developing new methods of online learning, students can be further aided in reaching goals and effectively solving problems.

The Handbook of Research on Innovative Pedagogies and Technologies for Online Learning in Higher Education is an authoritative reference source for the latest scholarly research on the implementation of instructional strategies, tools, and innovations in online learning environments. Features extensive coverage across a range of relevant perspectives and topics, such as social constructivism, collaborative learning and projects, and virtual worlds.

Readers:

This publication is ideally designed for academicians, practitioners, and researchers seeking current research on best methods to effectively incorporate technology into the learning environment.

Topics Covered:

- Collaborative Learning
- Computer-mediated Communication (CMC)
- Constructive Learning Theory
- Content Communities
- Inclusive Learning
- Social Constructivism
- Social Media
- Universal Design for Learning (UDL)
- Virtual Worlds
