Issues and Trends in Technology and Human Interaction

Bernd Carsten Stahl
DeMontfort University, UK

Issues and Trends in Technology and Human Interaction consists of research in the areas of e-commerce through law and culture, intellectual capital in knowledge management, and the philosophy of technology, among other topics. This book also investigates the interaction of technology and humans from a variety of viewpoints, and presents technology assessment of software/hardware development, interaction and conversion between technologies and their impact on society, and phenomenology of e-government.

“Readers of this book will be impressed by the range of interdisciplinary coverage. The research presented here was undertaken by researchers from different continents with very different knowledge and understandings of the problem area.”

– Professor Stahl

Issues and Trends in Technology and Human Interaction...

- Addresses issues of current interest in the area of overlap between individual, organization, society, and technology
- Covers a variety of topics that reflect the breadth and importance of the field
- Shows that important research is being undertaken in areas ranging from religion to gender, from commercial organizations to law enforcement
- Goes beyond information technology and addresses some of the greater societal issues that we face with regards to our use of technology

About the Editor

Bernd Carsten Stahl, is currently a senior lecturer in the Faculty of Computer Sciences and Engineering and as a research associate at the Centre for Computing and Social Responsibility of De Montfort University, Leicester, UK. His area of research consists of philosophical, more specifically of normative, questions arising from the use of information and communication technology. The emphasis in this area is on the notion of responsibility. He researches the application of such normative questions in economic organisations, but also educational and governmental institutions. His second area of interest consists of epistemological questions in Information Systems research. He is a member of the editorial review board of the Journal of Information Systems Education and the Journal of International Technology and Information Management. Furthermore he continues to serve on conference committees, such as the Information Resource Management Association Conference or the European Conference on E-Government. He also serves as a reviewer for several other international journals and conferences.
