Current Issues and Trends in E-Government Research

Donald Norris, University of Maryland Baltimore County, USA

As emerging trends and research threads surface in the area of e-government, academicians, practitioners, and students face the challenge of keeping up-to-date with new and innovative practices. **Current Issues and Trends in E-Government Research** provides a complete synopsis of the latest technologies in information policy, security, privacy, and access, as well as the best practices in e-government applications and measurement.

Current Issues and Trends in E-Government Research presents the most current issues in e-government hardware and software technology, adoption and diffusion, planning and management, and philosophy.

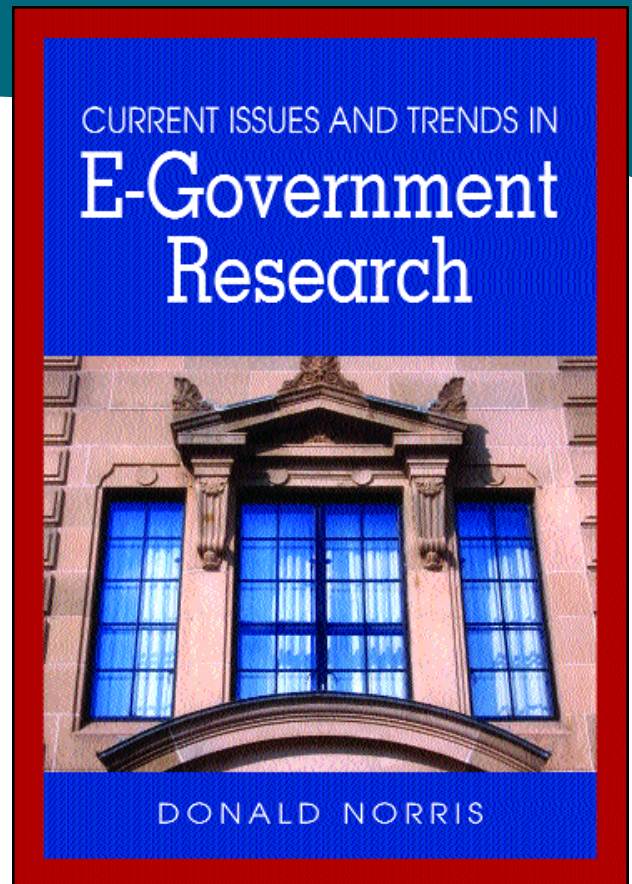

Table of Contents:

Chapter I	Assessing digital government at the local level worldwide: An analysis of municipal websites throughout the world	Chapter IX	A brave new e-world: An exploratory analysis of worldwide e-government readiness, level of democracy, corruption and globalization
Chapter II	The impact of the internet on political activism: Evidence from Europe	Chapter X	Scenarios for future use of e-democracy tools in Europe
Chapter III	E-government in Canada: Transition or transformation?	Chapter XI	The quest for advocates: Exploring the missing political good will for e-democracy in Europe
Chapter IV	Motives, strategic approach & focal areas in e-gov-induced change	Chapter XII	E-government research 2003-2006: Improvements and issues
Chapter V	E-government induced business process change (BPC): An empirical study of current practices	Chapter XIII	E-government research: Capabilities, interaction, orientation and values
Chapter VI	Computer security in electronic government: A state-local education information system	Chapter XIV	E-government adoption in Canadian municipal governments: A survey of Ontario chief administrative officers
Chapter VII	Measuring and explaining the quality of websites in the (virtual) House of Representatives		
Chapter VIII	Electronic democracy at the American grassroots

About the Editor

Donald F. Norris is Director of the Maryland Institute for Policy Analysis and Research (MIPAR) and Professor of Public Policy at the University of Maryland, Baltimore County (UMBC). He is a specialist in public management, urban affairs, and the application, uses and impacts of information technology in public organizations. He holds a B.S. in history from the University of Memphis and both an M.A. and a Ph.D. in government from the University of Virginia.

“**Current Issues and Trends in E-Government Research** endeavors to bring to both scholars and practitioners the latest and best in research into the phenomenon of e-government. This volume presents a wide range of research studies about a variety of aspects of e-government.”

Donald Norris

About this Book

- Discusses models that predict that e-government adoption will move from the informational to the interactive, transactional, integrative and transformational.
- Examines and evaluates the performance of government websites of 84 cities around the world by using a five stage framework employing 92 measures to analyze.
- Asks whether e-government related BPC practices are different from or similar to BPC practices in the private sector.
- Present possible scenarios for the future of e-democracy and the use of ICTs to facilitate e-democracy in Europe.
