Emerging Technologies for Semantic Work Environments: Techniques, Methods, and Applications

Edited by: Jörg Rech, Fraunhofer Institute for Experimental Software Engineering, Germany, Björn Decker, Fraunhofer Institute for Experimental Software Engineering, Germany, and Eric Ras, Fraunhofer Institute for Experimental Software Engineering, Germany

13-digit ISBN: 978-1-59904-877-2

372 pages; 2008 Copyright

Price: US \$180.00 (hardcover and online access*)

Pre-pub price[§]: US \$165.00

Online Access only^{**}: US \$132.00

Illustrations: figures, tables (8 1/2" x 11")

Translation Rights: World

*Paperback is not available. [§]Pre-pub price is good through one month after publication.

“This book provides an overview of the field of semantic work environments by bringing together various research studies from different subfields and underlining the similarities between the different processes, issues, and approaches.”

- Jörg Rech, Fraunhofer Institute for Experimental Software Engineering, Germany

Today's work is characterized by a high degree of innovation and thus demands a thorough overview of relevant knowledge in the world and in organizations. Semantic Work Environments support the work of the user by collecting knowledge about needs and providing processed and improved knowledge to be integrated into work.

Emerging Technologies for Semantic Work Environments: Techniques, Methods, and Applications describes an overview of the emerging field of Semantic Work Environments by combining various research studies and underlining the similarities between different processes, issues and approaches in order to provide the reader with techniques, methods, and applications of the study.

Subject:

Knowledge Management; Business/Management Information Technology and Systems; Environmental Information Systems; Internet and Web Technologies and Services

Market:

This essential publication is for all academic research libraries, as well as those involved in the Semantic Web, organizational knowledge, and e-collaboration. Academics, researchers, practitioners, and students with related interests will also find this publication useful.

Excellent addition to your library! Recommend to your acquisitions librarian.

Emerging Technologies for Semantic Work Environments: Techniques, Methods, and Applications

Edited by: **Jörg Rech**, Fraunhofer Institute for Experimental Software Engineering, Germany, **Björn Decker**, Fraunhofer Institute for Experimental Software Engineering, Germany, and **Eric Ras**, Fraunhofer Institute for Experimental Software Engineering, Germany

Table of Contents

Section I: Introduction

Chapter I: Enabling Social Semantic Collaboration – Bridging the Gap between Web 2.0 and the Semantic Web

Sören Auer, University of Leipzig, Germany

Zachary Ives, University of Pennsylvania, USA

Chapter II: Communication Systems for Semantic Work Environments

Thomas Franz, University of Koblenz-Landau, Germany

Sergej Sizov, University of Koblenz-Landau, Germany

Chapter III: Semantic Social Software: Semantically Enabled Social Software or Socially Enabled Semantic Web?

Sebastian Schaffert, Salzburg Research Forschungsgesellschaft, Austria

Section II: Semantic Work Environment Tools

Chapter IV: SWIM – A Semantic Wiki for Mathematical Knowledge Management

Christoph Lange, Jacobs University Bremen, Germany

Michael Kohlhase, Jacobs University Bremen, Germany

Chapter V: CoolWikNews: More than meet the eye in the XXI century journalism

Damaris Fuentes Lorenzo, University Carlos III of Madrid, Spain

Juan Miguel Gómez, University Carlos III of Madrid, Spain

Ángel García Crespo, University Carlos III of Madrid, Spain

Chapter VI: Improved Experience Transfer by Semantic Work Support

Roar Fjellheim, Computas AS, Norway

David Norheim, Computas AS, Norway

Chapter VII: A Semi-Automatic Semantic Annotation and Authoring Tool for a Library Help Desk Service

Antti Vehviläinen, Helsinki University of Technology, Finland

Eero Hyvönen, Helsinki University of Technology, Finland

Olli Alm, Helsinki University of Technology, Finland

Chapter VIII: A Wiki on the Semantic Web

Michel Buffa, Mainline, I3S Lab, France

Guillaume Erétéo, Edelweiss, INRIA, France

Fabian Gandon, Edelweiss, INRIA, France

Chapter IX: Personal Knowledge Management with Semantic Technologies

Max Völkel, FZI Research Center, Germany

Sebastian Schaffert, Salzburg Research Forschungsgesellschaft, Austria

Eyal Oren, Digital Enterprise Research Institute (DERI), Ireland

Chapter X: DeepaMehta – Another Computer is Possible

Jörg Richter, DeepaMehta Company, Germany

Jurij Poelchau, fx-Institute, Germany

Section III: Methods for Semantic Work Environments

Chapter XI: Added-Value: Getting People into Semantic Work Environments

Andrea Kohlhase, Jacobs University Bremen, Germany

Normen Müller, Jacobs University Bremen, Germany

Chapter XII: Enabling Learning on Demand in Semantic Work Environments: The Learning in Process Approach

Andreas Schmidt, FZI Research Center, Germany

Section IV: Techniques for Semantic Work Environments

Chapter XIII: Automatic Acquisition of Semantics from Text for Semantic Work Environments

Maria Ruiz-Casado, Universidad Autonoma de Madrid, Spain

Enrique Alfonseca, Universidad Autonoma de Madrid, Spain

Pablo Castells, Universidad Autonoma de Madrid, Spain

Chapter XIV: Technologies for Semantic Project-Driven Work Environments

Bernhard Schandl, University of Vienna, Austria

Ross King, Research Studios Austria, Austria

Niko Popitsch, Research Studios Austria, Austria

Brigitte Rauter, P.Solutions GmbH, Austria

Martin Povazay, P.Solutions GmbH, Austria

Chapter XV: An Integrated Formal Approach to Semantic Work Environments Design

Hai H. Wang, University of Southampton, UK

Jin Song Dong, National University of Singapore

Jing Sun, University of Auckland, New Zealand

Terry R. Payne, University of Southampton, England

Nicholas Gibbins, University of Southampton, UK

Yuan Fang Li, National University of Singapore

Jeff Pan, University of Aberdeen, UK

Chapter XVI: Lightweight Data Modeling in RDF

Axel Rauschmayer, University of Munich, Germany

Malte Kiesel, DFKI, Germany

About the Editors:

Jörg Rech is a project manager and senior scientist at the Fraunhofer Institute for Experimental Software Engineering (IESE) in Kaiserslautern, Germany. He received the B.S. (Vordiplom) and the M.S. (Diplom) in computer science with a minor in electrical science from the University of Kaiserslautern, Germany. His research mainly concerns software antipatterns, software patterns, defect discovery, software mining, software retrieval, automated software reuse, software analysis, and knowledge management. He is also the speaker of the GI working group on architectural and design patterns. Contact him at joerg.rech@iese.fraunhofer.de.

Björn Decker is a solution engineer for semantically enabled knowledge management solutions at empolis GmbH, part of avarto, a Bertelsmann company. Before that occupation, he was a project manager and scientist at the Fraunhofer Institute for Experimental Software Engineering (IESE) in Kaiserslautern, Germany. He received the B.S. (Vordiplom) and the M.S. (Diplom) in computer science from the University of Kaiserslautern, Germany. His research interests are experience management, in particular the collaborative maintenance of online repositories and usage of social software. He is a trainer concerning the usage of Wikis in software engineering companies and scientific writing. He organizes and is PC member of different workshops and conferences in the domain of software engineering, semantic Wikis and experience management. Contact him at bjoern.decker@gmail.com.

Eric Ras is a senior scientist at the Fraunhofer Institute for Experimental Software Engineering (IESE) in Kaiserslautern, Germany. He received the B.S. (Vordiplom) and the M.S. (Diplom) in computer science from the University of Kaiserslautern, Germany. His research interests are learning material production, vocational training methods, software patterns, and experience management. Eric Ras is scientific coordinator of the international distance learning program Software Engineering for Embedded Systems at the University of Kaiserslautern, Germany. He organized and is PC member of different workshops and conferences in the domain of software engineering, e-learning, and knowledge management. Contact him at eric.ras@iese.fraunhofer.de.
