Encyclopedia of Distance Learning, Second Edition (4-volume set)

4-volume set

“It is time for the educational community to reframe the meaning of education and what it means to be an educated person in the twenty-first century. It seems that what we ideally intend to do is to create a basis for learning how to learn, rather than supply what we assume all learners should learn before (push) they begin the real work of learning. I think the reader will find convincing evidence in these pages!”

- Patricia L. Rogers, Bemidji State University, USA

Subject:

IT Education; Mobile/Wireless Computing; Web Technologies; Global Information Technology; Human Aspects of Technology; Multimedia Technology; Networking/Telecommunications

Market:

This essential publication is for all academic and research libraries, as well as all those involved in the areas of blended learning, communities of learning, virtual education, instructional technology, flexible learning, distance education, and collaborative learning. All educators required to integrate synchronous and asynchronous technologies into the classroom will find this reference invaluable. Researchers, practicing teachers, education technology specialists, and students in a full range of education and IT-related fields will also benefit.

Edited by: Patricia L. Rogers, Bemidji State University, USA, Gary A. Berg, California State University, USA, Judith V. Boettecher, Designing for Learning, USA, Caroline Howard, Emory University, USA, Lorraine Justice, Georgia Institute of Technology, USA, and Karen D. Schenk, K. D. Schenk and Associates Consulting, USA

13-digit ISBN: 978-1-60566-198-8

2,612 pages; 2009 Copyright

Price: US \$1,195.00 (hardcover*)

Perpetual Access: US \$1,795.00

Print + Perpetual Access: US \$2,390.00

Illustrations: figures, tables (8 1/2" x 11")

Translation Rights: World

*Paperback is not available..

Educational practices and techniques are seemingly endless due to classroom integration and use of distance learning programs and technologies. With the eyes of academic communities looking towards these advanced learning integrations to take education into the future, knowledge on recent developments and practical solutions to educational problems are pertinent to educators of the 21st century.

The **Encyclopedia of Distance Learning, Second Edition** encompasses the latest concepts, trends, issues, and technologies in the field of distance learning, providing an audience of practitioners, researchers, educators, and students with a critical mass of knowledge on an emerging and significant educational field of study. Containing over 100 research articles by internationally-renowned professionals, this must-have resource contributes the latest findings and practices in topic areas such as computer-based learning, teaching methodologies, and distance learning programs.

Excellent addition to your library! Recommend to your acquisitions librarian.

Encyclopedia of Distance Learning, Second Edition

Edited by: **Patricia L. Rogers**, Bemidji State University, USA, **Gary A. Berg**, California State University, USA, **Judith V. Boettcher**, Designing for Learning, USA, **Caroline Howard**, Emory University, USA, **Lorraine Justice**, Georgia Institute of Technology, USA, and **Karen D. Schenk**, K. D. Schenk and Associates Consulting, USA

Key Features:

- 185 authoritative contributions by the world's leading experts on distance learning
- Comprehensive coverage of each specific topic, highlighting recent trends and describing the latest advances in the field
- More than 4,600 references to existing literature and research on distance learning
- A compendium of over 1,400 key terms with detailed definitions
- Organized by topic and indexed, making it a convenient method of reference for all IT/IS scholars and professionals
- Cross-referencing of key terms, figures, and information pertinent to distance learning

Topics Covered:

- Blended learning environments
- Change management in e-learning
- Collaborative and cooperative learning
- Designing online courses
- Distance learning instructional design
- Distance learning in incarcerated populations
- Distance learning professional associations
- Electronic student teaching portfolio
- E-mentoring
- Flexible online learning
- Information literacy
- Instructional design and technology
- Interactive e-lab
- Minorities and the online university
- Online mental training

About the Editors:

Patricia L. Rogers (PhD) is a Professor at Bemidji State University in the department of Professional Education, with doctoral preparation in both art education and instructional systems and technology. She is on several state level committees and is a consultant for the Minnesota State Colleges and Universities' Office of Instructional Technology where she recently served as the interim system director. Dr. Rogers is a Getty Fellow (Dissertation Fellowship from the Getty Center for Arts Education) and a Fulbright Scholar (2000-2001) working on designing distance learning programs. She consults internationally on e-learning, is the author of several articles on instructional technology, and regularly presents at technology and art education conferences. She was the keynote speaker at UT 2001, a technology and education conference held in Reykjavik, (Iceland).

Gary A. Berg (PhD) is currently Director of Extended Education and Distance Learning for California State University, (Channel Islands). He has worked in higher education for many years as an administrator and was Director of Extended Education at Chapman University. Dr. Berg has developed many distance learning format courses and programs, been interviewed for numerous national publications, and consulted for educational and government organizations on the use of distance learning. He is author of *Why Distance Learning?* And over twenty articles on higher education and the use of technology in education. Prof. Berg is the editor of the book "The Knowledge Medium: Designing Effective Computer-Based Learning Environment", (2003), Information Science Publishing.

Judith Boettcher (PhD) is a consultant and author in the areas of designing for learning, faculty development, and the future trends of technology in teaching and learning. Dr. Boettcher is also a Lecturer at the University of Florida in distance, continuing, and executive education. Prof. Boettcher has consulted with a wide range of major universities and organizations; has been a Syllabus Scholar since 1996; and serves on a number of editorial and academic advisory boards. Dr. Boettcher has been involved with the leading edge implementation of technologies for online and distance instruction for over 25 years; and has authored and edited many articles and books on these topics.

Caroline Howard (PhD) is an author, editor, consultant, and educator. She is an associate professor at Touro University International. Prior to joining Touro, she was on the faculty of Emory University's Goizueta Business School and the University of Colorado at Colorado Springs. Caroline holds an MBA from The Wharton School, University of Pennsylvania, and a PhD in management information systems from the University of California, (Irvine), where she received honors for her teaching and research. She has published a number of articles on technology and learning. Her books include *Winning the Net Game: Becoming Profitable Now that the Web Rules have Changed* (Entrepreneur Press, 2002), *The Design and Management of Effective Distance Learning Programs* (Idea Group Publishing, 2002), *Distance Learning and University Effectiveness: Changing Educational Paradigms for Online Learning* (forthcoming, Information Science Publishing). For more information on Caroline, visit her Web site at www.techknowledge-e.com or www.carolinehoward.com.

Lorraine Justice (PhD) is currently at the Hong Kong Polytechnic University. Dr. Justice has served in higher education for the past fifteen years, teaching in the areas of industrial design and human computer interface design. She has published and presented her work worldwide on topics such as interface design. She assists educational institutions worldwide with curriculum development. Dr. Justice was responsible for organizing the First China-USA Industrial Design Conference in Beijing, and the First Doctoral Education in Design Conference in Ohio. Dr. Justice was recently made a Fellow of the Industrial Design Society of America (IDSA). She has twice served on the Business Week/IDSA IDEA jury for best products and is a jurist for international paper competitions.

Karen D. Schenk (PhD) is a professor of information systems at the University of Redlands, California, and North Carolina State University, teaching courses in Information Technology and Systems Design. Her research has focused on distance education, lifelong learning, decision support systems and human-computer interfaces. She is currently Senior Partner of K. D. Schenk and Associates Consulting, working with companies on decision support systems development and IT internal customer relationships. Prof. Schenk is the co-editor of two books "The Design & Management of Effective Distance Learning Programs", (2002), Information Science Publishing, and the book "Distance Learning and University Effectiveness", (2004), Information Science Publishing.
