In global environments, healthcare organizations are required to be flexible and resilient in coping with uncertain and complex circumstances.

Redesigning Innovative Healthcare Operation and the Role of Knowledge Management collects a compilation of chapters on how knowledge impacts the layout and design of the medical industry. A cutting-edge reference source within the field, this book provides comprehensive frameworks, constraints, and performances analyzed by experts within the healthcare sector.

Subject:
Knowledge Management; Health Information Systems; Medical Technologies; Business & Organizational Research

Market:
This essential publication will be invaluable to academic and research libraries as well as those interested in the inner-workings of the medical industry. Students, educators, and researchers in medical related fields such as healthcare management and medical practitionering will find this cutting-edge reference provides the most in-depth analysis of key tools and techniques necessary for designing innovative healthcare operations.

Excellent addition to your library! Recommend to your acquisitions librarian.

Table of Contents

**Section I: Fundamental Aspects of Knowledge and Knowledge Management**
- Chapter I: The Knowledge Economy for Innovating Organizations
- Chapter II: Xerons Knowledge for Enhancing the Participants to Develop Organizational Learning Capability
- Chapter III: Permitting the True Potential of Knowledge Assets to be utilized with a Knowledge Management Infrastructure
- Chapter IV: Normal Science and Post-Normal Science: A Critique and Examples From Health Care

**Section II: Approaches to Operations Management and Human Action**
- Chapter V: Holistic/Whole Systems Approaches to Human Action In Individual and collective levels
- Chapter VI: Conceptual Levels of Information Processing and Information Interpretation in knowledge management
- Chapter VII: The Intelligence Continuum and Emergency and Disaster Scenarios
- Chapter VIII: Evaluation of Human Action: Foucault’s Power/Knowledge Corollary
- Chapter IX: Key Consideration for the Adoption and Implementation of Knowledge Management in Healthcare Operations
- Chapter X: Realising the Healthcare Value Proposition: the need for KM and technology

**Section III: Case studies illustrating key workplace issues**
- Chapter XI: Perceived Organizational Environment and Performance Reliability in the Case of Hospital Nurses
- Chapter XII: Roles of Interpersonal Relationships in Improving Organizational Performances in the Case of Hospital Nurses
- Chapter XIII: Interference of Mood States at Work with Perceived Performance, Perceived Efficacy and Perceived Health
- Chapter XIV: Causal Relationship among Perceived Organizational Environment, Leadership and Organizational Learning in Industrial Workers

**Section IV: Case studies illustrating key issues and investigations at the community level**
- Chapter XV: Eye-Movement and Performance during Reading by Cerebral Palsy Patients
- Chapter XVI: Role of Home Care and Rehabilitation Equipment for the Aged Who Need Care in Improving Performance
- Chapter XVII: The First Attempt of Intensive Approaches in Cognitive Rehabilitation in Clients with Severe Traumatic Brain Injury
- Chapter XVIII: Further Directions in Cognitive Rehabilitation in Community- and Home-Based Daily Trainings in Clients with Severe Traumatic Brain Injury

**About the Editors:**

**Murako Saito** is a representative of Health Care Technology Management Research Center in Tokyo, and research adviser in the Institute of Future Healthcare Policy in Waseda University. She had been a professor of cognitive ergonomics, organizational ergonomics in Graduate and Undergraduate Courses in Industrial and Management Systems Engineering, School of Science and Engineering, Waseda University, and as the position that preceded Waseda University, she had been a professor of Industrial Health, Healthcare Management in Dept. of Health Sciences, School of Medicine, University of Ryukyu. She received a PhD of Health Sciences from Faculty of Medicine, University of Tokyo where she graduated. She had been a Fulbright Scholarship Grantee authorized by US Department for continuing to study in Graduate School of Public Health and Teachers College, Columbia University (New York, USA). Dr. Saito has been involved in several associations and serves as an editorial board of national and international journals. She serves currently for NPO Joint Lecture-Consultation Plans. Her major research interests are on organizational redesign and transformation into innovative organizations by strategic knowledge management in the processes of cognition-action coupling or the recursive processes of organizational learning, and by fostering the participants to be a healthy actor and harnessing potentiality of the participants in individual and collective levels.

**Nilmini, Wickramasinghe** [PhD, MBA, Grad Dip Mgt St, BSc.Amus A (piano) A.mus A (violin)] researches and teaches in various areas of MIS with a special focus of the confluence of KM and healthcare. She is well published with over 100 refereed articles, book chapters, numerous books and an encyclopedia. Dr. Wickramasinghe regularly presents her work throughout Australasia, Europe and North America. She is the US representative of HCTM (Healthcare Technology Management) association, holds a professor position at RMIT University Australia and is the associate director for the Centre for the Management of Technology at IIT, in Chicago. In addition, Dr Wickramasinghe is the editor in chief of two journals published by IndScience: IJBET, Intl. J Biomedical Engineering and Technology (www.indscience.com/ijbet) and IJNVO, Intl. J Networking and Virtual Organisations (www.indscience.com/ijnvo).

**Masako Fuji** is a director of Non-Profit-Organization of TBI (Traumatic Brain Injury) Rehabilitation Center located in Tokyo. Dr. Fuji had been an associate professor in Medical School, Hamamatsu University and a professor in Nursing School of Hamamatsu University after making career of psychological clinician and also brain researcher as being an assistant and instructor at Bain Research Institute of University of Tokyo. Dr. Fuji has a wide experience of consulting with many clients with TBI and their families by giving them progress programs on the abilities of attention, memory and executive functions she prepared for each client and his/her families, and she has also conducting lectures on cognitive rehabilitation for the practitioners and for the classes in nursing schools in Japan.

**Eliezer (Elie) Geisler** is a distinguished professor at the Stuart School of Business, Illinois Institute of Technology and Director of the IIT Center for the Management of Medical Technology. He holds a doctorate from the Kellogg School at Northwestern University. Dr. Geisler is the author of nearly 100 papers in the areas of technology and innovation management, the evaluation of R&D, science and technology, and the management of healthcare and medical technology. He is the author of several books, including: Managing the Aftermath of Radical Corporate Change (1997), The Metrics of Science and Technology (2000), also translated into Chinese, Creating Value with Science and Technology (2001) and Installing and Managing Workable Knowledge Management Systems (With Rubenstein, 2003). His forthcoming books are: Knowledge and Knowledge Systems: Learning from the Wonders of the Mind, and a textbook: Knowledge Management Systems: Theory and Cases (With Wickramasinghe). He consulted for major corporations and for many U.S. federal departments, such as Defense, Agriculture, Commerce, EPA, Energy, and NASA. Dr. Geisler is the co-founder of the annual conferences on the Hospital of the Future, and the Health Care Technology and Management Association, a joint venture of several universities in 10 countries. He serves on various editorial boards of major journals. His current research interests include the nature of knowledge management in general and in complex systems, such as healthcare organizations.
