Full-Text Scholarly Books and Reference Works Available When and Where You Need Them

- Over 25,000 full-text chapters in PDF from nearly 1,000 scholarly books and reference works
- Precise search and retrieval through database of chapter-level abstracts and indexing
- Updated continuously as new IGI Global books go to press
- Electronic version of all documents available before print release
- Unrivalled among scholarly book publishers in coverage depth of computer science and information technology management research
- Perpetual access or annual subscription pricing available
- Priced at a fraction of the combined print value!

Rated 10 out of 10 by Library Journal!
A Scholarly Collection of Innovative Titles

Responding to strong international market demand, IGI Global in 2007 launched InfoSci®-Books, a fully searchable database providing access to chapters from every book and reference work IGI Global has published since the year 2000. IGI Global is an industry-leading publisher of scholarly research on advanced computer science and information technology research with an especially strong focus on the role, impact, and effective use of technology across a variety of settings, including business, education, health care, government, and more. Through our comprehensive databases of electronic content from scholarly books and journals, as well as distinguished printed books, reference works, peer-reviewed journals, conference proceedings, and teaching cases, IGI Global covers computer science and information technology management with a depth and breadth unmatched by any other publisher.

An Essential Resource for:

- Academics, researchers, and practitioners in computer science and information technology management research and a wealth of other fields impacted by technology
- Students and teachers
- Distance and online learning practitioners
- Business professionals
- Medical personnel
- And more

A Critical Addition to Your Library:

- Dramatically broader access to innovative content from IGI Global
- Search or browse by keywords, subject categories, title, authors, affiliations, and more
- Limit and sort by document type, publication year, and more
- Unlimited, site-wide and remote access for an unlimited number of simultaneous, affiliated users
- Continuous updates as new books go to press
- Quality reference works including encyclopedias and handbooks
- Incredible value for your budget – perpetual electronic access to a full collection for a fraction of the $300,000 value in combined list prices!

25 Subject Collections:

All IGI Global publications are divided into twenty subject specific collections. These subject collections make InfoSci®-Books an ideal database for interdisciplinary research in the wealth of fields impacted by information technology, including:

- Artificial Intelligence
- Bioinformatics
- Business Information Systems
- Cognitive Informatics
- Data Mining/Databases
- Electronic Business
- Electronic Commerce
- Electronic Government
- Environmental Informatics
- Global Information Technology
- Health Information Systems
- High Performance Computing
- Human Aspects of Technology
- Industrial Informatics
- IT Education
- IT Security/Ethics
- Knowledge Management
- Library Science
- Medical Technologies
- Mobile/Wireless Computing
- Multimedia Technology
- Networking/Telecommunication
- Social Computing
- Software/Systems Design
- Web Technologies

Selected Subject Areas and Sample Titles

Artificial Intelligence
- Artificial Intelligence for Maximizing Content Based Image Retrieval
- Encyclopedia of Artificial Intelligence (3 volumes)
- Handbook of Research on Synthetic Emotions and Sociable Robotics: New Applications in Affective Computing and Artificial Intelligence

Biomedical
- Handbook of Research on Artificial Immune Systems and Natural Computing: Applying Complex Adaptive Technologies
- Advancing Artificial Intelligence through Biological Process Applications
- Biological Data Mining in Protein Interaction Networks

Business Information Systems
- Cases on Information Technology Entrepreneurship
- Encyclopedia of Decision Making and Decision Support Technologies (2 volumes)
- Strategic Information Technology and Portfolio Management

Cognitive Informatics
- Novel Approaches in Cognitive Informatics and Natural Intelligence
- Cognitive Effects of Multimedia Learning
- Managing Cognitive Load in Adaptive Multimedia Learning

Data Mining/Databases
- Progressive Methods in Data Warehousing and Business Intelligence: Concepts and Competitive Analytics
- Data Mining and Knowledge Discovery Technologies
- Semantic Mining Technologies for Multimodal Databases

Electronic Business
- Cyberlaw for Global E-Business: Finance, Payments, and Dispute Resolution
- Cases on Managing E-Services
- Electronic Business: Concepts, Methodologies, Tools, and Applications (4 volumes)

Electronic Commerce
- Consumer Behavior, Organizational Development, and Electronic Commerce: Emerging Issues for Advancing Modern Socioeconomies
- Consumer Protection: Theories of Human Relativism
- Ubiquitous Commerce for Creating the Personalized Marketplace: Concepts for Next Generation Adoption

Electronic Government
- Handbook of Research on Public Information Technology (2 volumes)
- E-Justice: Using Information Communication Technologies in the Court System
- Handbook of Research on ICT-Enabled Transformational Government: A Global Perspective

Environmental Informatics
- Web-Based Green Products Life Cycle Management Systems: Reverse Supply Chain Utilization
- Handbook of Research on Geoinformatics

Global Information Technology
- Global Mobile Commerce: Strategies, Implementation, and Case Studies
- Handbook of Research on Information Management and the Global Landscape
- Information Communication Technologies and Globalization of Retail Applications

Health Information Systems
- Encyclopedia of Healthcare Information Systems (3 volumes)
- Patient-Centered E-Health
- Handbook of Research on Information Technology Management and Clinical Data Administration in Healthcare (2 volumes)

High Performance Computing
- Handbook of Research on Grid Technologies and Utility Computing: Concepts for Managing Large-Scale Applications
- Grid Technology for Maximizing Collaborative Decision Management and Support: Advancing Effective Virtual Organizations
- Quantitative Quality of Service for Grid Computing: Applications for Heterogeneity, Large Scale Distribution, and Dynamic Environments

Human Aspects of Technology
- Gender and Information Technology: Moving Beyond Access to Co-Creating Global Partnership
- Exploration of Space, Technology, and Spatiality: Interdisciplinary Perspectives
- Selected Readings on the Human Side of Information Technology

IT Education
- Encyclopedia of Distance Learning, Second Edition (4 volumes)
- Cases on Global E-Learning Practices: Successes and Pitfalls
- Handbook of Research on Assessment Technologies, Methods, and Applications in Higher Education

IT Security/Ethics
- Computer Security, Privacy, and Politics: Current Issues, Challenges, and Solutions
- Handbook of Research on Technoethics (2 volumes)
- Cyber Security and Global Information Assurance: Threat Analysis and Response Solutions

Knowledge Management
- Knowledge and Knowledge Systems: Learning from the Wonders of the Mind
- Current Issues in Knowledge Management
- Building Organizational Memories: Will You Know What You Knew?

Library Science
- Electronic Resource Management in Libraries: Research and Practice
- Author Categorization Analysis: Quantitative Methods for Mapping the Intellectual Structure of an Academic Discipline

Medical Technologies
- Nursing and Clinical Informatics: Socio-Technical Approaches
- Handbook of Research on Distributed Medical Informatics and E-Health
- Handbook of Research on Computational Grid Technologies for Life Sciences, Biomedicine, and Healthcare (2 volumes)

Mobile/Wireless Computing
- Mobile Computing: Concepts, Methodologies, Tools, and Applications (6 volumes)
- Internet-Enabled Handheld Devices, Computing, and Programming: Mobile Commerce and Personal Data Applications
- Multimedia Transcoding in Mobile and Wireless Networks

Multimedia Technology
- Interactive Multimedia Music Technologies
- Encyclopedia of Multimedia Technology and Networking, Second Edition (3 volumes)
- Handbook of Research on Wireless Multimedia: Quality of Service and Solutions

Networking/Telecommunication
- Building the Knowledge Society on the Internet: Sharing and Exchanging Knowledge in Networked Environments
- Encyclopedia of E-Collaboration
- Handbook of Research on Telecommunications Planning and Management for Business (2 volumes)

Social Computing
- Handbook of Research on Virtual Workplaces and the New Nature of Business Practices
- Social Networking Communities and E-Dating Services: Concepts and Implications
- E-Collaboration: Concepts, Methodologies, Tools, and Applications (3 volumes)

Software/Systems Design
- Designing Software-Intensive Systems: Methods and Principles
- Model-Driven Software Development: Integrating Quality Assurance
- Software Engineering: Effective Teaching and Learning Approaches and Practices

Web Technologies
- Interactive Web-Based Virtual Reality with Java 3D
- Handbook of Research on Text and Web Mining Technologies (2 volumes)
- Social Web Evolution: Integrating Semantic Applications and Web 2.0 Technologies
