Computational Linguistics: Concepts, Methodologies, Tools, and Applications
A Comprehensive Three Volume Set

Institutions Receive Free 2-Year Online eAccess with Print Purchase

Information Resources Management Association (USA)
Computational Linguistics: Concepts, Methodologies, Tools, and Applications (3 Vols.)

Information Resources Management Association (USA)
ISBN: 978-1-46666-042-7; EISBN: 978-1-46666-043-4
© 2014; 1,600 pages.

In a globalized society, effective communication is critical, and study of language from a mathematical perspective can shed light on new ways in which to express meaning across cultures and nations.

Computational Linguistics: Concepts, Methodologies, Tools, and Applications explores language by dissecting the phonemic aspects of various communication systems in order to identify similarities and pitfalls in the expression of meaning. With applications in a variety of areas, from psycholinguistics and cognitive science to computer science and artificial intelligence, this multivolume reference work will be of use to researchers, professionals, and educators on the cutting edge of language acquisition and communication science.

Covering:
1. Computational Linguistics
2. Conversational Agents
3. Language Acquisition
4. Language Processing
5. Morphology
6. Psycholinguistics
7. Semantics
8. Structural Grammar
9. Syntax

Price:
Print + Free 2-Year Online eAccess: $2,195
Online Perpetual eAccess: $3,295
Print + Online Perpetual eAccess: $4,290

eSubscription:
One (1) Year eSubscription: $1,025
Two (2) Year eSubscription: $1,725
Table of Contents:

“Evaluator”
Paz Ferrero (Universidad Autónoma de Madrid, Spain) & Ciudad Universitaria de Cantoblanco, Spain), Rachel Whittaker (Universidad Autónoma de Madrid, Spain & Ciudad Universitaria de Cantoblanco, Spain) and Javier Aldea (University Complutense of Madrid, Spain)

A Customizable Language Learning Support System Using Ontology-Driven Engine
Jingyun Wang (Kochi University of Technology, Japan), Takahiko Mendori (Kochi University of Technology, Japan) and Juan Xiong (Xiamen University of Technology, China)

A Domain-Specific Language for High-Level Parallelization
Ritu Arora (Texas Advanced Computing Center, USA), Purushotham Bangalore (University of Alabama at Birmingham, USA) and Marjan Mernik (University of Maribor, Slovenia)

A Formal Semantics of Kermit
Moussa Amrani (University of Luxembourg, Luxembourg)

A Generic Approach for the Semantic Annotation of Conceptual Models Using a Service-Oriented Architecture
Hans-Georg Fill (Stanford Center for Biomedical Informatics Research, Stanford University, USA), Daniela Schremser (University of Vienna, Austria) and Dimitris Karagiannis (University of Vienna, Austria)

A New Clustering Method with Fuzzy Approach Based on Takagi-Sugeno Model in Queuing Systems
Jingyun Wang (Kochi University of Technology, Japan), Takahiko Mendori (Kochi University of Technology, Japan) and Juan Xiong (Xiamen University of Technology, China)

A Preliminary Study of Neuro-Linguistic Programming in Nonprofit Organizations
Eric Kong (University of Southern Queensland, Australia) and Mark Farrell (RMIT University, Australia)

A Proposal to Study of Cross Language Information Retrieval (CLIR) System Users’ Information Seeking Behavior
YooJin Ha (Clarion University, USA)

A Semantic Approach to Linkedin Profiles
Ilias Kapareliotis (Abertay Dundee University, UK) and Patricia Crosbie (Abertay Dundee University, UK)

About the Use of the DMs in CLIL Classes
Anna Consosni (Ufficio Scolastico Regionale per il Veneto, Italy)

Abstraction of Computer Language Patterns
Jaroslav Porubán (Technical University of Košice, Slovakia), Ján Kolář (Technical University of Košice, Slovakia) and Miroslav Sabo (Technical University of Košice, Slovakia)

Advanced Question-Answering and Discourse Semantics
Patrick Saint-Dizier (IRIT-CNRS, France)

An Exploration about Krashen’s Input Hypothesis in the Computer Network Environment
Cui Junyuan (Zangzhou Teachers College, China)

An Investigation of the Relationship of Motivation, Attitudes and Environment
Helen, Yeh Wai Man (The Hong Kong Polytechnic University (CPCE), China)

Building Awareness of Language Structures with Visual-Syntactic Text Formatting
Youngmin Park (University of California – Irvine, USA), Mark Warschauer (University of California – Irvine, USA), Penelope Collins (University of California – Irvine, USA), Jin Kyoung Hwang (University of California – Irvine, USA) and Charles Vogel (Eagle Valley Schools, USA)

Building Collaborations between University Pre-Service Student-Teachers and English Language Students through a Socially Mediated Network
Dustin De Felice (Michigan State University, USA) and Eric Kong (University of Southern Queensland, Australia)

UnCOVER: Uncovering Product Strengths and Weaknesses
Kaiquan S. J. Xu (City University of Hong Kong, Hong Kong), Wei Wang (City University of Hong Kong, Hong Kong), Jimmy Ren (City University of Hong Kong, Hong Kong), Jin S. Y. Xu (Southwest Jiaotong University, China) and Stephen Liao (City University of Hong Kong, Hong Kong)

Comparison Between Internal and External DSLs via RubyTL and Gra2MoL
Jesús Sánchez Cuadrado (Universidad Autónoma de Madrid, Spain), Javier Luís Cánovas Izquierdo (École des Mines de Nantes – INRIA – LINA, France) and Jesús García Molina (Universidad de Murcia, Spain)

Computational Intelligence Using Type-2 Fuzzy Logic Framework
A. Neogi (The University of Burdwan, India), A.C. Mondal (The University of Burdwan, India) and S.K. Mandal (National Institute of Technical Teachers’ Training & Research, India)

Content and Language Integrated Learning in Higher Education
Giovanna Carloni (University of Urbino, Italy)

Corporate Linguistic Rights through the Prism of Company Linguistic Identity Capital
Magdalena Bieletowska-Grajeewska (University of Gdańsk, Poland)

Corpus Linguistics
Angeline M. Madongonda (Zimbabwe Open University, Zimbabwe) and Sithembeni Denhere (Zimbabwe Open University, Zimbabwe)

Data Hiding for Text and Binary Files
Hioki Hirohisa (Kyoto University, Japan)

Demystifying Domain Specific Languages
Abdelillah Kahiaou (École de Technologie Supérieure, Canada) and Alain Abran (École de Technologie Supérieure, Canada)

Editor Information:

Information Resources Management Association (IRMA) is a research-based professional organization dedicated to advancing the concepts and practices of information resources management in modern organizations. IRMA’s primary purpose is to promote the understanding, development and practice of managing information resources as key enterprise assets among IRM/IT professionals. IRMA brings together researchers, practitioners, academicians, and policy makers in information technology management from over 50 countries.
Ontology-Based Multimodal Language Learning
Miloš Milutinovic (University of Belgrade, Serbia), Vukasin Stojiljkovic (Institute for the Serbian Language of the Serbian Academy of Sciences and Arts, Serbia) and Saša Lazarevic (University of Belgrade, Serbia)

Ontology-Supported Design of Domain-Specific Languages
István Dávid (Budapest University of Technology and Economics, Hungary) and László Gónczy (Budapest University of Technology and Economics, Hungary)

Parsing Bangla Grammar Using Context Free Grammar
Al-Mahmud (Khulna University of Engineering and Technology (KUET), Bangladesh), Bishnu Sarkar (Khulna University of Engineering and Technology (KUET), Bangladesh) and K. M. Azharul Hasan (Khulna University of Engineering and Technology (KUET), Bangladesh)

Producing Pathways to Proficient Pronunciation with Learner-Designed Pronunciation Stations
James M. Perren (Eastern Michigan University in Ypsilanti, USA)

Re/Designing Online Platforms by Citizen Designers and Its Contribution to the Digital Writing and Research
Rajendra Kumar Panthee (University of Texas – El Paso, USA)

Representing Music as Work in Progress
Gerard Roma (Universitat Pompeu Fabra, Spain) and Perfecto Herrera (Universitat Pompeu Fabra, Spain)

Second Language Learners’ Spoken Discourse
Catia Cucchiarini (Radboud University, The Netherlands) and Helmer Strik (Radboud University, The Netherlands)

Semantic Role Labeling Approach for Evaluation of Text Coherence
Mohamed H. Hagagg (Computer Science Department, Faculty of Computers and Information, Helwan University, Egypt)

Semantics-Driven DSL Design
Martin Erwig (Oregon State University, USA) and Eric Walkingshaw (Oregon State University, USA)

Software Language Engineering with XMF and XMelder
Tony Clark (Middlesex University, UK) and James Williams (HSBC, UK)

Statistical Machine Translation
Lucia Specia (University of Sheffield, UK)

Teachers’ Experience as Foreign Language Online Learners
Congcong Wang (Washington State University, USA)

Technology and Second Language Writing
Soobin Yim (University of California – Irvine, USA) and Mark Warschauer (University of California – Irvine, USA)

Technology-Mediated Tasks in English for Specific Purposes (ESP)
Cédric Sarré (Université Paris-Sorbonne, France)

Telling Tales with Talking Texts
Sheila Filhan (The College of Saint Rose, USA)

The French Digital Kitchen
Paul Seedhouse (Newcastle University, UK), Anne Preston (Newcastle University, UK), Patrick Olivier (Newcastle University, UK), Dan Jackson (Newcastle University, UK), Philip Heslop (Newcastle University, UK), Thomas Plötz (Newcastle University, UK), Madeline Balaam (Newcastle University, UK), and Saandia Ali (University of Rennes, France)

The Opinions and Attitudes of the Foreign Language Learners and Teachers Related to the Traditional and Digital Games
Levent Uzun (Uludag University, Bursa, Turkey), M. Tugba Yildiz Ekin (Uludag University, Bursa, Turkey) and Erdogen Kartal (Uludag University, Bursa, Turkey)

The Use of VLE for Monitoring Independent Learning in Large Cohort Provision
Catherine Franc (University of Manchester, UK) and Annie Morton (University of Manchester, UK)

They Can’t Fix What They Can’t Hear
Peter Fadde (Southern Illinois University Carbondale, USA)

Tools for the Automatic Generation of Ontology Documentation
Silvio Peroni (University of Bologna, Bologna, Italy), David Shotton (University of Oxford, UK) and Fabio Vitali (University of Bologna, Italy)

Towards a Bio-Inspired Theoretical Linguistics to Model Man-Machine Communication
Gemma Bel-Enguix (Laboratoire d’Informatique Fondamentale, CNRS-Aix-Marseille University, Marseille, France) and M. Dolores Jiménez-López (Research Group on Mathematical Linguistics, Universitat Rovira i Virgili, Tarragona, Spain)

Towards Dynamic Semantics for Synthesizing Interpreted DSLs
Peter J. Clarke (Florida International University, USA), Yali Wu (University of Detroit Mercy, USA), Andrew A. Allen (Georgia Southern University, USA), Frank Hernandez (Florida International University, USA), Mark Allison (Florida International University, USA) and Robert France (Colorado State University, USA)

Transnational Preservice Teachers’ Literate Lives and Writing Pedagogy in a Digital Era
Minda Morren López (Texas State University – San Marcos, USA) and Carol Brochin (University of Texas – El Paso, USA)

Two Distinct Sequence Learning Mechanisms for Syntax Acquisition and Word Learning
Anne McClure Walk (Saint Louis University, USA) and Christopher M. Conway (Georgia State University, USA)

Usage-Based Instruction
Serafima Gettys (Lewis University, USA)

Using Social Network-Mediated Bridging Activities to Develop Socio-Pragmatic Awareness in Elementary Korean
Jonathon Reinhardt (University of Arizona, USA) and Jieun Ryu (University of Arizona, USA)

Words that Fascinate the Listener
Felix Weninger (Technische Universität München, Germany), Pascal Staudt (Technische Universität München, Germany) and Björn Schuller (Technische Universität München, Germany)

Writing from and with Community Knowledge
María Paula Ghiso (Teachers College, Columbia University, USA), Patricia Martínez-Álvarez (Teachers College, Columbia University, USA) and Bessie P. Dernikos (Teachers College, Columbia University, USA)
Encyclopedia of Information Science and Technology, Third Edition (10 Vols.)

Mehdi Khosrow-Pour, D.B.A. (Information Resources Management Association, USA)
ISBN: 978-1-4666-5888-2; EISBN: 978-1-4666-5889-9; © 2015; 5,000 pages.

Information acquisition and management has always had a profound impact on societal and organizational progression. However, as computing dramatically advances the level of intelligence associated with management technologies, the breadth of their dispersal, and ultimately the impact of the information itself, the utilization and management of information science and technology also gains profound importance. This change-driven environment creates a critical need for a comprehensive, up-to-date reference encompassing the full range of concepts, issues, methods, technologies, and trends associated with the field.

The Encyclopedia of Information Science and Technology, Third Edition, due for release in 2014, will include authoritative, research-based articles contributed by thousands of researchers and experts from all over the world. This discipline-defining encyclopedia will serve research needs in numerous fields that are affected by the rapid pace and substantial impact of technological change. It is an essential addition to any academic library’s reference collection.

Institutions Receive Free Lifetime Online eAccess with Print Purchase*

Pre-Pub Price:**
Print + Free Online eAccess: $3,750
Original Price: US $3,950
Online Perpetual Access Only: $3,560
Original Price: US $3,750

eSubscription:
One (1) Year eSubscription: $1,840
Two (2) Year eSubscription: $3,110

**Pre-Publication price valid through October 31, 2014.
