As the age of Big Data emerges, it becomes necessary to take the five dimensions of Big Data—volume, variety, velocity, volatility, and veracity—and focus these dimensions towards one critical emphasis—value. The Encyclopedia of Business Analytics and Optimization confronts the challenges of information retrieval in the age of Big Data by exploring recent advances in the areas of knowledge management, data visualization, interdisciplinary communication, and others. Through its critical approach and practical application, this book will be a must-have reference for any professional, leader, analyst, or manager interested in making the most of the knowledge resources at their disposal.

Covering:
1. Big Data Mining & Analytics
2. Branding
3. Cloud Computing
4. Cyber Physical Systems
5. Decision Support Systems
6. Forecasting
7. Game Theory
8. Intelligent Techniques & Methods
9. Knowledge Management
10. Marketing
11. Medical Diagnosis
12. Payment Models
13. Portfolio Procurement
14. Project Management
15. Quality Control
16. Risk Detection
17. Simulation
18. Social Networking & Social Media
19. Supply Chain Management
20. Web Service Composition

Institutions Receive Free 2-Year Online eAccess with Print Purchase*

Pre-Pub Price:**
Print + Free 2-Year Online eAccess: $2,560
Original Price: US $2,695
Perpetual Online eAccess: $3,845
Original Price: US $4,045
Print + Perpetual Online eAccess: $5,120
Original Price: US $5,390

eSubscription:
One (1) Year eSubscription: $1,255
Two (2) Year eSubscription: $2,120

*Institutions receive 2-Years Free Online eAccess with every print purchase of IGI Global Handbooks of Research, Encyclopedias, Dictionaries, and/or Multi-Volume Book Collections.

**Pre-Publication price good through October 31, 2014.
Table of Contents:

3-Step Analytics Success with Parsimonious Models
Chris Schlueter Langdon, Claremont Graduate University, California, USA

A Mathematical Model to Plan EHR Systems Adoption
Oscar Tamburis, Italian National Research Council, Italy; Fabrizio L. Ricci, Italian National Research Council, Italy; Fabrizio Pecoraro, Italian National Research Council, Italy

A New Tree-based Classifier for Satellite Images
Reshu Agarwal, Acadia University, Canada; Pritam Ranjan, Acadia University, Canada

Academic Analytics
Si Chen, Murray State University, USA

Advanced Information Sharing in Supply Chains
Qiannong Gu, Ball State University, USA; Xiuli He, University of North Carolina at Charlotte, USA; Satyajit Saravane, University of North Carolina at Charlotte, USA

Advanced Methodologies Descriptions and Applications
Brad Morantz, Prime Solutions Group Inc., USA

Agent-Based Service Analytics
Yang Li, British Telecom, UK

An Overview of Cognition Roles in Decision-making
Thaís Spiegel, Rio de Janeiro State University, Brazil; Anadolu University Eskisehir, Turkey

Analysis of Maintenance Operations-A Case Application
Mehmet Savsar, Kuwait University, Kuwait

Analysis of Non-Stationary Time-Series Business Data
George Saridakis, Kingston University, UK; Grammatoula Papaoiannou, Loughborough University, UK

Analytic Rubrics for Decision Making
Alan F. Chow, University of South Alabama, USA; Kelly C. Woodford, University of South Alabama, USA

Analytical for Nonprofits
Caroline M. Mularz, Capital University, USA; M. Ali Ülkü, Capital University, USA

Anonymity and Pseudonymity in Data-Driven Science
Heidelinde Hobel, SBA Research, Austria; Sebastian Schrittwieser, SBA Research, Austria; Peter Kieseberg, SBA Research, Austria; Edgar Weippl, SBA Research, Austria

Ant Colony Algorithm for Single Stage Supply Chain
R. Sridharan, National Institute of Technology Calicut, India; Vinay V. Panicker, National Institute of Technology Calicut, India

Ant Colony Algorithm for Two Stage Supply Chain
R. Sridharan, National Institute of Technology Calicut, India; Vinay V. Panicker, National Institute of Technology Calicut, India

Applied Game Theory in Business Analytics
William P. Fox, Naval Postgraduate School, USA

Applying Process Mining to the Emergency Department
Pavlos Delias, Technological Educational Institute of Kavala, Greece; Panagiotis Manolitzas, Technical University of Crete, Greece; Evangelos Grigoroudis, Technical University of Crete, Greece; Nikolaos Matsatinsis, Technical University of Crete, Greece

Artificial Bee Colony Algorithm
Ömür TOSUN, Akdeniz University, Turkey

Artificial Neural Networks for Business Analytics
William A. Young II, Ohio University, USA; Trevor J. Bihl, Air Force Institute of Technology, USA; Gary R. Weckman, Ohio University, USA

Assessment of Disruption Risks in Supply Chains
Kanokporn Kungwalsong, The Pennsylvania State University, USA; A. Ravi Ravindran, The Pennsylvania State University, USA

Bankruptcy Prediction Using Data Mining Tools
Wiki Kwak, University of Nebraska at Omaha, USA

Barriers to e-Application in Agrifood Supply Chain
Rupesh Kumar, Indian Institute of Technology Roorkee, India; Rajat Agrawal, Indian Institute of Technology Roorkee, India; Vinay Sharma, Indian Institute of Technology Roorkee, India

Bayesian Variable Selection
Oleg Okun, SMARTTECO, Stockholm, Sweden

Behavioral Performance Evaluation
Mohsen Afshanian, Technische Universität Braunschweig, Germany; Heinz Ahn, Technische Universität Braunschweig, Germany; Nadia Vazquez Novoa, Technische Universität Braunschweig, Germany

Behavioral Planning Theory
Shih-Kung Lai, Zhejiang University, China and National Taipei University, Taiwan; Haoying Han, Zhejiang University, China

Benchmarking of Indian Rail Freight by DEA
Neeraj Bhanoth, Guru Nanak Dev Engineering College, India; Harwinder Singh, Guru Nanak Dev Engineering College, India; Rajbir Singh Bhatti, Shaheed Bhashpat Singh College of Engineering & Technology, India

Bender Decomposition
Georgios K.D. Saharidis, University of Thessaly, Greece

Editor Biography:

John Wang is a professor in the Department of Information & Operations Management at Montclair State University, USA. Having received a scholarship award, he came to the USA and completed his PhD in operations research from Temple University. Due to his extraordinary contributions beyond a tenured full professor, Dr. Wang has been honored with a special range adjustment in 2006. He has published over 100 refereed papers and seven books. He has also developed several computer software programs based on his research findings.

He is the Editor-in-Chief of International Journal of Applied Management Science, International Journal of Operations Research and Information Systems, and International Journal of Information Systems and Supply Chain Management. He is the Editor of Data Warehousing and Mining: Concepts, Methodologies, Tools, and Applications (six-volume) and the Editor of the Encyclopedia of Data Warehousing and Mining, 1st (two-volume) and 2nd (four-volume). His long-term research goal is on the synergy of operations research, data mining, and cybernetics.
Biased Randomization of Classical Heuristics
Angel A. Juan, IN3-Open University of Catalonia, Spain; José Cáceres-Cruz, IN3-Open University of Catalonia, Spain; Sergio González-Martín, IN3-Open University of Catalonia, Spain; Daniel Riera, IN3-Open University of Catalonia, Spain; Barry B. Barrios, IN3-Open University of Catalonia, Spain

Big Data Analytics: Trends and Case Studies
Hoda Ahmed Abdelhafez, Suez Canal University, Egypt

Big Data Mining and Analytics
Carson Kai-Sang Leung, University of Manitoba, Canada

Big Data Problem, Technologies and Solutions
Hoda Ahmed Abdelhafez, Suez Canal University, Egypt

Big Data Techniques and Applications
Gamze Ozel, Hacettepe University, Ankara, Turkey

Bio-Inspired Modelling to Generate Alternatives
Raha Yeomans, York University, Canada; Julian Scott

Business Case Analytics
Francisco Cua, FCC Consultants, Inc., Philippines

Business Intelligence through Analytics and Foresight
Hassan Rasheed, Taif University, Saudi Arabia; Howard Rasheed, University of North Carolina-Wilmington, USA

Business Model Innovation and the Balanced Scorecard
Stephanie Black, University of Texas at San Antonio, USA; Montresa Washington, Case Western Reserve University, USA; Howard Rasheed, University of North Carolina-Wilmington, USA

Business Processes, Dynamic Contexts, Learning
Michael M. Richter, University of Calgary, Canada

Business Successes of Malaysian Housing Developers
Mastura Jaafar, University Sains Malaysia, Malaysia; Azlan Raufudin Nuruddin, University Sains Malaysia, Malaysia; Syed Putra Syed Abu Bakar, University Sains Malaysia, Malaysia

Centralize vs. Decentralize
Eftychia Kostarelou, University of Thessaly, Greece; Georgios K.D. Saharidis, University of Thessaly, Greece

Chaos in Economics
Wei-Bin Zhang, Ritsumeikan Asia Pacific University, Japan

Class-based weighted NB for Text Categorization
Mahsa Paknejhad, Shiraz University of Technology, Iran; Marzieh Ahmadzadeh, Shiraz University of Technology, Iran

Class-Dependent Principal Component Analysis
Oleg Okun, SMARTTECCO, Stockholm, Sweden

Composite Classifiers for Bankruptcy Prediction
Efstatios Kirkos, ATEI of Thessaloniki, Greece

Computational Intelligence in Survival Analysis
Malgorzata Kretowska, Bialystok University of Technology, Poland

Concept-Oriented Model
Alexandr Savinov, SAP AG, Germany

Concept-Oriented Query Language
Alexandr Savinov, Technische Universität Dresden, Germany

Constrained Nonlinear Optimization in Business
William P. Fox, Naval Postgraduate School, USA

Copula-Based Multivariate Time Series Models
Iva Mihaylova, University of St. Gallen, Switzerland

Credit Scoring in the Age of Big Data
Billie Anderson, Bryant University, USA; J. Michael Hardin, University of Alabama, USA

Cuckoo Search Algorithm
Ömür Toyn, Akdeniz University, Turkey

Customer Lifetime Value Estimation via Machine Learning
Tarun Rathi, Indian Institute of Technology Kharagpur, India; Vadilamani Ravi, Institute for Development and Research in Banking Technology Hyderabad, India

Cyber Physical Systems: A Review
Siddhartha Khaitan, Iowa State University, USA; James D. McCalley, Iowa State University, USA

Data Envelopment Analysis for Operational Efficiency
Ramalingam Shanmugam, Texas State University, USA

Data Guided Public Healthcare Decision Making
Ramalingam Shanmugam, Texas State University, USA

Data Mining Applications in Accounting and Finance
WiiKi KwaK, University of Nebraska at Omaha, USA; Susan Eldridge, University of Nebraska at Omaha, USA; Yong Shi, University of Nebraska at Omaha, Chinese Academy of Sciences, USA; Gang Kou, University of Electronic Science and Technology of China, China

Data Mining for Business Analytics in Retail
Min Gan, Honghua Dai, Deakin University, Australia

Data Mining through Modelling in Irrigation Commands
Pradeep Kumar Majumdar, Adama Science and Technology University, Ethiopia

Data Mining Tools – Association Rules
Sanjiv K. Bhatia, University of Missouri – St. Louis, USA; Jitender S. Deogun, University of Nebraska, Lincoln, USA

Data Mining Tools - Formal Concept Analysis and Rough Sets
Sanjiv K. Bhatia, University of Missouri, USA; Jitender S. Deogun, University of Nebraska, USA

Data Stream Mining
Jesse Read, Universidad Carlos III, Spain; Albert Bifet, Yahoo! Research Barcelona, Spain

Database Techniques for Multi Cores and Big Memory
Xiongqi Qin, Renmin University of China, China; Biao Qiu, Renmin University of China, China; CuiPing Li, Renmin University of China, China; Hong Chen, Renmin University of China, China; Xiaoyong DU, Renmin University of China, China; Shan Wang, Renmin University of China, China

Data-driven Simulation-based Analytics
Durai Sundaramoorthy, Washington University in St. Louis, USA

Decision Making Methods
M. Govindarajan, Annamalai University, India

Decision Support Systems in Business
Trevor J. Bihi, Air Force Institute of Technology, USA; William A. Young II, Ohio University, USA; Gary R. Weckman, Ohio University, USA

Defining a Business Driven Optimization Problem
Shokoufeh Mirzaei, California Polytechnic University, USA

Design Configuration in Industrialized House Building
Fredrik Wikberg, Lund University, Sweden; Anders Ekholm, Lund University, Sweden; Stefan Olander, Lund University, Sweden

Data Mining in Economics
Wei-Bin Zhang, Ritsumeikan Asia Pacific University, Japan

Designing Supply Chains Using Optimization
Jairo R. Montoya-Torres, Universidad de La Sabana, Colombia, and University of Leeds, UK

Digital Watermarking Techniques for Images - Survey
Channapragada R. S. G. Rao, Geethanjali College of Engineering and Technology, A. P., India; V. Ravi, Institute for Development and Research in Banking Technology (IDRBT), A. P., India; Munaga. V. N. Prasad, IDRBT, A. P., India; E. V. Gopal, IDRBT, A. P., India

Disaggregate Model to Forecast
Matthew Roman, University of Missouri, USA; Woosung Jang, University of Missouri, USA

Distributed Programming Models for Big Data Analytics
Rakhi Saxena, University of Delhi, India

Economic Value Added
Paola Modesti, University of Parma, Italy

Efficient High Dimensional Data Classification
Harj Seetha, VIT University, Vellore, India; M. Narasimha Murty, Indian Institute of Science, Bangalore, India

Emergence of NoSQL Platforms for Big Data Needs
Jyotsna Taleja Wassan, Maitreyi College, University of Delhi, India

Empirical Approaches to Assess Manufacturing Agility
P.G. Saleeshya, Amrita Vishwa Vidyapeetham (University), Coimbatore, India

Empirical Likelihood-Based Method for LME Models
Haiyan Su, Montclair State University, USA

Ensuring QoS over Wireless Channels for E-learning
Sparsh Mittal, Iowa State University, USA

Equilibria for Traffic Network with Capacity Constraints
Zhi Lin, Chongqing Jiaotong University, China; Jiangtao Luo, University of Nebraska Medical Center, USA

Estimating Risk with Copulas
Iva Mihaylova, University of St. Gallen, Switzerland

Ethical Issues of Qualitative Research
Md. Salah Uddin Rajib, Wuhan University of Technology, P.R.Cina; Nusrat Zahan Mou, Jahangirnagar University, Bangladesh

OLAP over Uncertain and Imprecise Data Streams
Alfredo Cuzzocrea, ICAR-CNR and University of Calabria, Italy

I would like to strongly recommend Encyclopedia of Business Analytics and Optimization as a useful source of information about the new challenges that Business Analytics will have to deal with during the next years. It provides the reader with deep knowledge about recent works in business analytics, and many ideas for solving such hard problems in optimization and business analytics, using powerful methodologies, as machine learning and data mining techniques.

Table of Contents

Individuals and industry can benefit from the discussions surrounding Business Analytics and Big Data as they are presented in this publication:

- Healthcare
- Retail
- Pharmaceuticals
- Banking and Financial Institutions
- Public Sector
- Manufacturing
- Transportation
- Service Operations
- Travel Industry
- Energy Management
- Environmental Protection
- Biology
- Genomics
- Clinical Research
- Internet Searches
- Meteorology
- Complex Physics Simulations
- Small Businesses

The more successful enterprises recognize that analytics based on ever-increasing and vast amounts of data, coupled with optimized decision processes, signal tremendous opportunities for new business advantages. If you are looking for new knowledge in this area, go no further – filled with a diverse set of topics, this five-volume encyclopedia is a valuable resource of Business Analytics for the academic and the practitioner alike.

- Chanaka Edirisinghe, The University of Tennessee, U.S.A.
Information acquisition and management has always had a profound impact on societal and organizational progression. However, as computing dramatically advances the level of intelligence associated with management technologies, the breadth of their dispersal, and ultimately the impact of the information itself, the utilization and management of information science and technology also gains profound importance. This change-driven environment creates a critical need for a comprehensive, up-to-date reference encompassing the full range of concepts, issues, methods, technologies, and trends associated with the field.

The Encyclopedia of Information Science and Technology, Third Edition is a 10-volume compilation of authoritative, research-based articles contributed by thousands of researchers and experts from all over the world. This discipline-defining encyclopedia will serve research needs in numerous fields that are affected by the rapid pace and substantial impact of technological change. With an emphasis on modern issues and the presentation of potential opportunities, prospective solutions, and future directions in the field, it is a relevant and essential addition to any academic library’s reference collection.
