

New Release September 2008

Handbook of Research on Web Log Analysis

Edited by: Bernard J. Jansen, Penn State University, USA, Amanda Spink, Queensland University of Technology, Australia, and Isak Taksa, Baruch College, City University of New York, USA

13-digit ISBN: 978-1-59904-974-8

628 pages; 2009 Copyright

Price: US \$265.00 (hardcover*)

Perpetual Access: US \$400.00

Print + Perpetual Access: US \$ 530.00

Illustrations: figures, tables (8 1/2" x 11")

Translation Rights: World

*Paperback is not available.

“This book reflects on the multifaceted themes of Web use and presents various approaches to log analysis”.

-Bernard J. Jansen, Penn State University, USA

Subject:

Web Technologies; IT Security/Ethics;
Software/Systems Design

Market:

This essential publication is for all academic and research libraries as well as all researchers and end-users alike who are interested in the multifaceted themes of Web use and various approaches to log analysis. Academics, practitioners, and students enthralled in the history of Web log analysis and new trends including the issues of privacy, social interaction, and community building, will also benefit.

Whether searching, shopping, or socializing, Web users leave behind a great deal of data revealing their information needs, mindset, and approaches used, creating vast opportunities for Web service providers as well as a host of security and privacy concerns for consumers.

The **Handbook of Research on Web Log Analysis** reflects on the multifaceted themes of Web use and presents various approaches to log analysis. This expansive collection reviews the history of Web log analysis and examines new trends including the issues of privacy, social interaction and community building. Over 20 research contributions from international experts comprehensively cover the latest user-behavior analytic and log analysis methodologies, and consider new research directions and novel applications. An essential holding for library reference collections, this Handbook of Research will benefit academics, researchers, and students in a variety of fields, as well as technology professionals interested in the opportunities and challenges presented by the massive collection of Web usage data.

Excellent addition to your library! Recommend to your acquisitions librarian.

Handbook of Research on Web Log Analysis

Edited by: **Bernard J. Jansen**, Penn State University, USA,
Amanda Spink, Queensland University of Technology, Australia, and
Isak Taksa, Baruch College, City University of New York

Table of Contents

Chapter I: Research and Methodological Foundations of Transaction Log Analysis

Bernard J. Jansen, The Pennsylvania State University, USA

Isak Taksa, Baruch College, USA

Amanda Spink, Queensland University of Technology, Australia

Section I: Web Log Analysis: perspectives, issues and directions

Chapter II: Historic Perspective of Log Analysis

W. David Penniman, Nylink, USA

Chapter III: Surveys as a Complementary Method to Web Log Analysis

Lee Rainie, Pew Internet & American Life Project, USA

Bernard J. Jansen, The Pennsylvania State University, USA

Chapter IV: Watching the Web: An Ontological and Epistemological Critique of Web-Traffic Measurement

Sam Ladner, York University, USA

Chapter V: Privacy Issues Associated with Web Logging Data

Kirstie Hawkey, University of British Columbia, Canada

Section II: Methodology and Metrics

Chapter VI: The Methodology of Search Log Analysis

Bernard J. Jansen, The Pennsylvania State University, USA

Chapter VII: Uses, Limitations, and Trends in Web Analytics

Tony Ferrini, Acquiremarketing.com, USA

Jakki J. Mohr, University of Montana, USA

Chapter VIII: A Review of Methodologies for Analyzing Websites

Danielle Booth, The Pennsylvania State University, USA

Bernard J. Jansen, The Pennsylvania State University, USA

Chapter IX: The Unit of Analysis and the Validity of Web Log Data

Gi Woong Yun, Bowling Green State University, USA

Chapter X: Recommendations for Reporting Web Usage Studies

Kirstie Hawkey, University of British Columbia, USA

Melanie Kellar, Google, USA

Section III: Behavior Analysis

Chapter XI: From Analysis to Estimation of User Behavior

Seda Ozmutlu, Uludag University, Turkey

Huseyin C. Ozmutlu, Uludag University, Turkey

Amanda Spink, Queensland University of Technology, Australia

Chapter XII: An Integrated Approach to Interaction Design and Log Analysis

Gheorghe Muresan, Microsoft Corporation, USA

Chapter XIII: Tips for Tracking Web Information Seeking Behavior

Brian Detlor, McMaster University, Canada

Maureen Hupfer, McMaster University, Canada

Umar Ruhi, University of Ottawa, Canada

Chapter XIV: Identifying Users' Stereotypes for Dynamic Web Pages Customization

Sandro José Rigo, Universidade Federal do Rio Grande do Sul, Brazil

José Palazzo M. de Oliveira, Universidade Federal do Rio Grande do Sul, Brazil

Leandro Krug Wives, Universidade Federal do Rio Grande do Sul, Brazil

Chapter XV: Finding Meaning in Online, Very-scale Conversation

Brian K. Smith, The Pennsylvania State University, USA

Priya Sharma, The Pennsylvania State University, USA

Kyu Yon Lim, The Pennsylvania State University, USA

Goknur Kaplan Akilli, The Pennsylvania State University, USA

KyoungNa Kim, The Pennsylvania State University, USA

Toru Fujimoto, The Pennsylvania State University, USA

Paula Hooper, The Pennsylvania State University, USA

Section IV: Query Log Analysis

Chapter XVI: Machine Learning Approach to Search Query Classification

Isak Taksa, Baruch College, USA

Sarah Zelikovitz, The College of Staten Island City University of New York, USA

Amanda Spink, Queensland University of Technology, Australia

Chapter XVII: Topic Analysis and Identification of Queries

Seda Ozmutlu, Uludag University, Turkey

Huseyin C. Ozmutlu, Uludag University, Turkey

and Amanda Spink, Queensland University of Technology, Australia

Chapter XVIII: Query Log Analysis in Biomedicine

Elmer V. Bernstam, University of Texas, USA

Jorge R. Herskovic, University of Texas, USA

William R. Hersh, Oregon Health & Science University, USA

Chapter XIX: Processing and Analysis of Search Query Logs in Chinese

Michael Chau, The University of Hong Kong, Hong Kong

Yan Lu, The University of Hong Kong, Hong Kong

Xiao Fang, The University of Toledo, USA

Christopher C. Yang, The Chinese University of Hong Kong, Hong Kong

Chapter XX: Query Log Analysis for Adaptive Dialogue-Driven Search

Udo Kruschwitz, University of Essex, U.K

Nick Webb, Institute for Informatics, Logics and Security Studies, USA

Richard Sutcliffe, University of Limerick, Ireland

Section V: Contextual and Specialized Analysis

Chapter XXI: Using Action-Object Pairs as a Conceptual Framework for Transaction Log Analysis

Mimi Zhang, The Pennsylvania State University, USA

Bernard J. Jansen, The Pennsylvania State University, USA

Chapter XXII: Analysis and Evaluation of the Connector Website

Paul DiPerna, The Blau Exchange Project, USA

Chapter XXIII: Information Extraction from Blogs

Marie-Francine Moens, Katholieke Universiteit Leuven, Belgium

Chapter XXIV: Nethnography: a Naturalistic Approach towards Online Interaction

Adriana Andrade Braga, Pontificia Universidade Católica do Rio de Janeiro

Chapter XXV: Web Log Analysis: Diversity of Research Methods

Isak Taksa Baruch College, USA

Amanda Spink, Queensland University of Technology, Australia

Bernard J. Jansen, The Pennsylvania State University, USA

About the Editors:

Bernard J. Jansen is an assistant professor in the College of Information Sciences and Technology at The Pennsylvania State University. Jim has more than 150 publications in information technology and systems across a multi-disciplinary range of journals and conferences. His areas of expertise are Web searching, sponsored search, and personalization for information searching. He is co-author of the book, *Web Search: Public Searching of the Web*. Jim is a member of the editorial boards of six international journals. He has received awards and honors, including an ACM Research Award and six application development awards, along with other writing, publishing, research, and leadership honors. Several agencies and corporations have supported his research. He teaches both undergraduate and graduate courses, as well as mentoring students in various research and educational efforts. He also has successfully conducted numerous consulting projects.

Amanda Spink is professor in the Faculty of Information Technology at the Queensland University of Technology and co-leader of the information science cluster. Her primary research includes: basic, applied, industry and interdisciplinary studies in information science, information behavior, cognitive information retrieval; Web retrieval, including relevance, feedback and multitasking models. Professor Amanda Spink has published over 300 journal articles, refereed conference papers and book chapters, and 5 books. She is a member of numerous journal editorial boards including: *Information Processing and Management*, *Journal of Documentation*, *Journal of Information Systems Education and Webology*.

Isak Taksa is an associate professor in the Department of Computer Information Systems at Baruch College of the City University of New York (CUNY). His primary research interests include information retrieval, knowledge discovery and text and data mining. He has published extensively on theoretical and applied aspects of information retrieval and search engine technology in journals including *Information Retrieval*, *Journal of the American Society for Information Science*.
