We would like to thank all of the authors for their excellent contributions to this book. Our deep appreciation and gratitude goes to all the reviewers who provided their insightful and constructive comments, in particular to Tyrone Grandison of IBM Almaden Research Centre, Weiliang Zhao of University of Western Sydney, Jennifer Chandler of University of Ottawa, Stéphane Lo Presti of University of London, Dimitar Christozov of American University in Bulgaria, Elizabeth Sillence of Northumbria University, Karen Fullam and Suzanne Barber of University of Texas at Austin, and last but not least, George Forester, our Business Development Office colleague.

Our thanks also go to all who were involved in the collation and review process of this book. Without their support, the project could not have been satisfactorily completed. Special thanks also go to all of the staff at Idea Group Inc. Their contributions through the whole process, from inception of the initial idea to final publication, have been very helpful. In particular, we would like to thank Jan Travers, whose guidance through the initial contract formulation process made it all possible, Mehdi Khosrow-Pour, whose enthusiasm motivated us to initially accept the invitation to take on this project, and Kristin Roth, who continuously prodded via e-mail for keeping the project on schedule.

Finally, we are indebted to the Institute for Information Technology, National Research Council Canada, for providing us the resources for this project.

Ronggong Song, Larry Korba, and George Yee
