Acknowledgment

This book would not have been possible if it were not for the hard work of the many individuals who have written chapters for it. As a group, they voluntarily spent hundreds of hours putting together a series of chapters that provide readers with an excellent overview of the theoretical and practical perspectives of online instructional modeling, as well as trends and issues that are affecting the field. We would like to express our deepest thanks and sincere appreciation to all these authors for their outstanding efforts.

Our appreciation also goes to our reviewers who provided insightful input and suggestions. We thank all of our authors for their own expert assistance. We would also like to thank the following reviewers in particular for their hard work, generous donation of their time, and their attention to detail: David Arentsen, LIM College; Graham Bodie, Purdue University; Jill Flygare, University of Utah, Jason Huett, University of Web Georgia; Lawrence Hugenberg, Kent State University; Karen Mallia, University of South Carolina; Dewar MacLeod, William Paterson University; Matt McAlack, Philadelphia Biblical University; Kenneth Miller, Youngstown University; Maureen Minielli, Kingsborough Community College; Jacquee Williamson, University of Utah; and Milda Yildiz, William Paterson University. The first editor would like to especially thank his graduate assistant Stephanie Donnelly at the University of Utah who assisted with proof-reading the chapters.

We would like to thank our editors at IGI Global, Kristin Roth, Meg Stocking, and Jessica Thompson for their efficiency and generosity in working with us, and the publishing team at IGI Global for their competence and expertise.

And last, but far from least, we owe a continual debt of gratitude to our families for their encouragement, love and support, the warm reception they give our work, and for their allowances for our work schedules. We could not have done it without them!
