Table of Contents

Preface.......................................................................................................................................................... xv

Introduction................................................................................................................................................ xix

Chapter 1
The Impact of ICT in Educating Students with Learning Disabilities in Australian Schools: An ANT Approach ........................................................................................................................................ 1

_Tas Adam, Independent Researcher, Australia_  
_Arthur Tatnall, Victoria University, Australia_

Chapter 2
How an Actor Network Theory (ANT) Analysis Can Help Us to Understand the Personally Controlled Electronic Health Record (PCEHR) in Australia ................................................................................................. 15

_Imran Muhammad, RMIT University, Australia_  
_Nilmini Wickramasinghe, Epworth Healthcare, Australia & RMIT University, Australia_

Chapter 3
Climate Information Use: An Actor-Network Theory Perspective ............................................................................................................ 35

_Maryam Sharifzadeh, Yasouj University, Iran_  
_Gholam Hossein Zamani, Shiraz University, Iran_  
_Ezatollah Karami, Shiraz University, Iran_  
_Davar Khalili, Shiraz University, Iran_  
_Arthur Tatnall, Victoria University, Australia_

Chapter 4
A Fluid Metaphor to Theorize IT Artifacts: A Post-ANT Analysis ........................................................................................................ 61

_Rennie Naidoo, University of Pretoria, South Africa_  
_Awie Leonard, University of Pretoria, South Africa_

Chapter 5
How the Rich Lens of ANT Can Help us to Understand the Advantages of Mobile Solutions .......... 87

_Nilmini Wickramasinghe, Epworth Healthcare, Australia & RMIT University, Australia_  
_Arthur Tatnall, Victoria University, Australia_  
_Steve Goldberg, INET Intl. Inc., Canada_
Chapter 6
Information and Communication Technology Projects and the Associated Risks

Tiko Iyamu, Namibia University of Science and Technology, Namibia
Petronnell Sehlola, Tshwane University of Technology, South Africa

Chapter 7
Actor-Network Theory: A Bureaucratic View of Public Service Innovation

Noel Carroll, University of Limerick, Ireland

Chapter 8
E-Health in Australia and Germany

Manuel Zwicker, RMIT University, Australia
Juergen Seitz, DHBW Heidenheim, Germany
Nilmini Wickramasinghe, Epworth Healthcare, Australia & RMIT University, Australia

Chapter 9
Human Interactions in Software Deployment: A Case of a South African Telecommunication

Tefo Sekgwele, Tshwane University of Technology, South Africa
Tiko Iyamu, Namibia University of Science and Technology, Namibia

Chapter 10
School Management Software in Australia and the Issue of Technological Adoption

Bill Davey, RMIT University, Australia
Arthur Tatnall, Victoria University, Australia

Chapter 11
Studying DNA: Envisioning New Intersections between Feminist Methodologies and Actor-Network Theory

Andrea Quinlan, Lakehead University, Canada

Chapter 12
Achieving E-Health Success: The Key Role for ANT

Nilmini Wickramasinghe, Epworth Healthcare, Australia & RMIT University, Australia
Arthur Tatnall, Victoria University, Australia

Chapter 13
Evolving Digital Communication: An Actor-Network Analysis of Social Networking Sites

Mohini Singh, RMIT University, Australia
Jayan Kurian, RMIT University, Vietnam

Chapter 14
Disturbing Practices in Engineering Design Projects

Fernando Abreu Gonçalves, CEG-IST, Portugal
José Figueiredo, CEG-IST/DEG, Portugal & Technical University of Lisbon, Portugal
