Table of Contents

Foreword ..................................................................................................................................................... ix

Preface ..................................................................................................................................................... xii

Acknowledgment ..................................................................................................................................... xvi

Section 1
Technological Game-Changers

Chapter 1
Sensors, Networks, and Clouds ...................................................................................................................... 1
SENSORS .................................................................................................................................................... 1
NETWORKS .................................................................................................................................................... 5
SMART ENVIRONMENTS: FROM THE WEB TO THE CLOUDS ................................................................. 9

Chapter 2
Keyboards, Screens, and Mice ....................................................................................................................... 19
INTRODUCTION ......................................................................................................................................... 19
KEYBOARDS AND POINTING DEVICES ................................................................................................. 21
SCREENS AND TOUCHSCREENS ............................................................................................................. 23
FLEXIBLE SCREENS ............................................................................................................................... 24
GESTURE RECOGNITION .......................................................................................................................... 25
BODY POSTURE RECOGNITION ............................................................................................................ 27

Chapter 3
Robotic Exoskeletons and Social, Companion, and Service Robots .......................................................... 34
SOCIAL, COMPANION, AND SERVICE ROBOTS .................................................................................... 34
SECURITY ................................................................................................................................................... 42
ROBOTIC EXOSKELETONS ....................................................................................................................... 43
THE FASHION FACTOR ............................................................................................................................. 44

Chapter 4
BCI, BNCl, and BMI ..................................................................................................................................... 49
INTRODUCTION ........................................................................................................................................... 49
BCI APPLICATIONS AND CHALLENGES ............................................................................................... 50
NON INVASIVE BCI: SUCCESS STORIES AND LESSONS FOR THE FUTURE ..................................... 53
Chapter 5
Advanced Prosthetics, Neuroprosthetics, and Artificial Limbs ................................................. 63
  PROGRESS IN NEUROPROSTHETICS ............................................................................. 63
  THE FUTURE OF PROSTHETICS ................................................................................. 66

Section 2
Assisted and Independent Living Applications

Chapter 6
Health and Human Services ................................................................................................. 79
  INTRODUCTION ........................................................................................................ 79
  ISSUES WITH COGNITIVE, BEHAVIORAL, AND OTHER DISORDERS ................. 83
  LIFE LOGGING, LIFE STREAMING, AND QS ............................................................ 89
  HUMAN FACTORS ...................................................................................................... 93
  THE NEED FOR AFFORDABILITY ........................................................................... 98
  E-HEALTH SERVICES BEYOND WWW .................................................................. 100

Chapter 7
Transport and Mobility ......................................................................................................... 112
  MOBILE TELEPRESENCE ROBOTS .......................................................................... 112
  SMART WHEELCHAIRS AND THEIR ISSUES ......................................................... 113
  THE FUTURE OF GUIDE-DOGS AND OTHER PETS ............................................... 119
  THE US MILITARY UNMANNED SYSTEMS ROADMAP ........................................ 120
  PUBLIC TRANSPORTATION INFRASTRUCTURE .................................................... 124

Chapter 8
Training, Teaching, and Learning ......................................................................................... 133
  INTRODUCTION ........................................................................................................ 133
  PRE-SCHOOL EDUCATION ...................................................................................... 137
  PRIMARY AND SECONDARY SCHOOL EDUCATION ............................................. 138
  THIRD LEVEL EDUCATION ..................................................................................... 146
  LIFELONG LEARNING FOR LIVING AND WORKING ........................................... 152
  TEACHING AND LEARNING INNOVATION ISSUES .............................................. 156

Chapter 9
Employment, Employability, and Entrepreneurship ............................................................. 167
  INTRODUCTION ........................................................................................................ 167
  EMPLOYABILITY ..................................................................................................... 169
  EMPLOYMENT ......................................................................................................... 175
  LEGISLATION AND POLICIES FOR EMPLOYMENT ............................................ 183
  ENTREPRENEURSHIP .............................................................................................. 186
Chapter 10
Consumer and Lifestyle ........................................................................................................ 196
 THE SHOPPING EXPERIENCE ........................................................................................... 196
 CONSUMING SERVICES ..................................................................................................... 203
 ATMS AND VENDING MACHINES .................................................................................. 205
 LIFE STYLE TRENDS ........................................................................................................ 209

Chapter 11
Media and Entertainment ....................................................................................................... 218
 WEB ACCESSIBILITY ISSUES ........................................................................................... 218
 WHEN PROBLEMS TURN INTO SOLUTIONS ...................................................................... 227
 PUBLISHING FOR ALL ....................................................................................................... 229
 TV ISSUES ......................................................................................................................... 231

Chapter 12
Democracy, Citizenship, and Activism ................................................................................ 241
 CITIZENSHIP IN THE AGE OF SOCIAL MEDIA .................................................................. 241
 SOCIAL MEDIA FOR SOCIAL JUSTICE .............................................................................. 244
 THE PROBLEM OF COMPLIANCE .................................................................................... 248
 THE POLITICS OF DISABILITY .......................................................................................... 252
 DESIGN ISSUES ................................................................................................................. 259

Section 3
Common Issues

Chapter 13
Human Performance ............................................................................................................. 267
 INTRODUCTION ................................................................................................................ 267
 HULC, E-LEGS, REWALK, AND HAL HUMAN EXOSKELETONS ...................................... 268
 THE ROLE OF SPORTS AS A MOTIVATOR ........................................................................ 269
 THE ROLE OF AESTHETICS AND DESIGN ................................................................... 270
 FASHION AND THE PROSTHETIC ENVY PHENOMENON ............................................... 271

Chapter 14
Systems and Complexity ..................................................................................................... 274
 COMPLETE SOLUTIONS FOR HUMAN SYSTEMS AND REDUNDANCY .......................... 274
 LIFE-LONG SOLUTION SYSTEMS .................................................................................. 276
 E-ACCESS TECHNOLOGIES FOR NON-DISABLED PEOPLE ......................................... 277
 EVOLUTIONARY APPROACHES TO THE DEVELOPMENT OF E-ACCESS MARKETS .... 279
 ACCELERATING THE EMERGENCE OF NEW INDUSTRIAL ECOSYSTEMS ................. 280
 TOOLS FOR MANAGING CHANGE IN COMPLEX SYSTEMS ........................................ 281
 THE ROLE OF OPEN STANDARDS IN SOFTWARE ......................................................... 282
 OPEN STANDARDS IN HARDWARE: THE CERN OHIL .................................................. 283
 TRANSFORMING PIONEERING PRODUCTS INTO PLATFORMS ...................................... 284
Chapter 15
Innovation ................................................................. 288
  INNOVATIONS IN THE ORGANIZATION OF RESEARCH AND INNOVATION ............................. 288
  OPEN INNOVATION, LEAD USERS, AND LIVING LABS .......................................................... 289
  THE R+DIY: RESEARCH AND ‘DO IT YOURSELF’ MODEL ..................................................... 290
  OTHER ORGANIZATIONAL PARADIGMS .................................................................................. 291
  TECHNOLOGY INNOVATION PLATFORMS AND THE ‘APP’ MODEL ........................................ 291
  INNOVATION PRIZES, COMPETITIONS, AND TOURNAMENTS .............................................. 292
  MARKET INNOVATION PLATFORMS ......................................................................................... 298
  BUSINESS MODEL INNOVATION ............................................................................................. 299
  THE ROLE OF DESIGN IN INNOVATION .................................................................................. 301
  EMERGING MARKET MODELS OF INNOVATION .................................................................. 303
  TRENDS IN ENTREPRENEURSHIP AND INNOVATION FINANCING ....................................... 305

Compilation of References ........................................................................................................ 310

About the Author ........................................................................................................................ 350

Index ........................................................................................................................................ 351
