Acknowledgment

This is the place that I greatly say my thanks to many people from the first that inspired me from their knowledge and their ideas to write this book. I am thankful for the comments of Prof. R. Logeswaran, Dr. Hasan S. Monadjemi, and Prof. Hamid R. Arabnia for their technical comments for improving the exposition. I am also grateful to Dr. Zia Tadayon for his invaluable knowledge of the heart. Other thanks belong to Dr. Mehrnaz Ataei for her knowledge on Hepatitis and ENT and providing the valid data. I am grateful to Dr. Haza Nuzly as I was inspired a lot from his knowledge and used his idea in my book. My last thanks but not the least belongs to the IGI global team for their patience until finishing the book and thanks to the reviewers of my book for their comments.
