Table of Contents

Preface ........................................................................................................................................... xxiv

Acknowledgment .......................................................................................................................... xxxi

Section 1
Research Perspective: Software and Hardware Design

Chapter 1
Collaborative Development of Dependable Cyber-Physical Systems by Co-Modeling and Co-Simulation........................................................................................................................................... 1

John Fitzgerald, Newcastle University, UK
Ken Pierce, Newcastle University, UK
Peter Gorm Larsen, Aarhus University, Denmark

Chapter 2
UML MARTE Time Model and Its Clock Constraint Specification Language ................................... 29

Frédéric Mallet, Université Nice Sophia Antipolis, I3S, UMR 7271, CNRS, INRIA, 06900 Sophia Antipolis, France
Marie-Agnès Peraldi-Frati, Université Nice Sophia Antipolis, I3S, UMR 7271, CNRS, INRIA, 06900 Sophia Antipolis, France
Julien Deantoni, Université Nice Sophia Antipolis, I3S, UMR 7271, CNRS, INRIA, 06900 Sophia Antipolis, France
Robert de Simone, INRIA Sophia Antipolis Méditerranée, 06900 Sophia Antipolis, France

Chapter 3
Symbolic-Based Monitoring for Embedded Applications........................................................................... 52

Pramila Mouttappa, Institut Mines-Telecom, France
Stephane Maag, Institut Mines-Telecom, France
Ana Cavalli, Institut Mines-Telecom, France

Chapter 4
Designing Resource-Constrained Embedded Heterogeneous Systems to Cope with Variability........... 75

Ian Gray, University of York, UK
Andrea Acquaviva, Politecnico di Torino, Italy
Neil Audsley, University of York, UK
Chapter 5
Vulnerabilities of Secure and Reliable Low-Power Embedded Systems and Their Analysis
Methods: A Comprehensive Study ................................................................. 102
Norbert Druml, Graz University of Technology, Austria
Manuel Menghin, Graz University of Technology, Austria
Christian Steger, Graz University of Technology, Austria
Armin Krieg, Infineon Technologies Austria, Austria
Andreas Genser, Infineon Technologies Austria, Austria
Josef Haid, Infineon Technologies Austria, Austria
Holger Bock, Infineon Technologies Austria, Austria
Johannes Grinschgl, Independent Researcher, Austria

Chapter 6
An Aspect-Oriented Approach to Hardware Fault Tolerance for Embedded Systems ............ 123
David de Andrés, Universitat Politècnica de València, Spain
Juan–Carlos Ruiz, Universitat Politècnica de València, Spain
Jaime Espinosa, Universitat Politècnica de València, Spain
Pedro Gil, Universitat Politècnica de València, Spain

Chapter 7
Optimized System-Level Design Methods for NoC-Based Many Core Embedded Systems .......... 150
Haoyuan Ying, Technische Universität Darmstadt, Germany
Klaus Hofmann, Technische Universität Darmstadt, Germany
Thomas Hollstein, Tallinn University of Technology, Estonia

Section 2
Development Methodologies and Tool Suites

Chapter 8
MADES FP7 EU Project: Effective High Level SysML/MARTE Methodology for Real-Time and Embedded Avionics Systems ............................................................. 181
Alessandra Bagnato, SOFTEAM, France
Imran Quadri, SOFTEAM, France
Etienne Brosse, SOFTEAM, France
Andrey Sadovykh, SOFTEAM, France
Leandro Soares Indrusiak, University of York, UK
Richard Paige, University of York, UK
Neil Audsley, University of York, UK
Ian Gray, University of York, UK
Dimitrios S. Kolovos, University of York, UK
Nicholas Matragkas, University of York, UK
Matteo Rossi, Politecnico di Milano, Italy
Luciano Baresi, Politecnico di Milano, Italy
Matteo Carlo Crippa, Txt e-Solutions, Italy
Stefano Genolini, Txt e-Solutions, Italy
Scott Hansen, The Open Group, UK
Gundula Meisel-Blohm, Airbus Defence and Space, Germany
Chapter 9
Requirements Refinement and Component Reuse: The FoReVer Contract-Based Approach............. 209
Laura Baracchi, Intecs, Italy
Alessandro Cimatti, FBK-Irst, Italy
Gerald Garcia, Thales Alenia Space, France
Silvia Mazzini, Intecs, Italy
Stefano Puri, Intecs, Italy
Stefano Tonetta, FBK-Irst, Italy

Chapter 10
Model-Based Analysis and Engineering of Automotive Architectures with EAST-ADL............... 242
Sara Tucci-Piergiovanni, CEA, LIST, 91191 Gif-sur-Yvette CEDEX, France
DeJiu Chen, KTH Royal Institute of Technology, Sweden
Chokri Mraidha, CEA, LIST, 91191 Gif-sur-Yvette CEDEX, France
Henrik Lönn, Volvo Technology, Sweden
Nidhal Mahmud, University of Hull, UK
Mark-Oliver Reiser, Technische Universität Berlin, Germany
Ramin Tavakoli Kolagari, Nuremberg Institute of Technology G. S. Ohm, Germany
Nataliya Yakymets, CEA, LIST, 91191 Gif-sur-Yvette CEDEX, France
Renato Librino, 4S s.r.l., Italy
Sandra Torchiaro, Centro Ricerche Fiat, Italy
Agnes Lanusse, CEA, LIST, 91191 Gif-sur-Yvette CEDEX, France

Chapter 11
Fostering Analysis from Industrial Embedded Systems Modeling ............................................. 283
Michel Bourdellès, Thales Communications and Security, France
Shuai Li, Thales Communications and Security, France
Imran Quadri, Softeam, France
Etienne Brosse, Softeam, France
Andrey Sadovykh, Softeam, France
Emmanuel Gaudin, PragmaDev, France
Frédéric Mallet, INRIA, France
Arda Goknil, University of Luxembourg, Luxembourg
David George, Rapita Systems Ltd., UK
Jari Kreku, VTT Technical Research Centre, Finland

Chapter 12
A Model-Driven Engineering Method for DRE Defense Systems Performance Analysis and Prediction................................................................. 301
Katrina Falkner, The University of Adelaide, Australia
Vanea Chiprianov, The University of Adelaide, Australia
Nickolas Falkner, The University of Adelaide, Australia
Claudia Szabo, The University of Adelaide, Australia
Gavin Puddy, The University of Adelaide, Australia
Section 3
Industry Perspective and Applications

Chapter 13
Industrial Applications of Emulation Techniques for the Early Evaluation of Secure Low-Power Embedded Systems

Norbert Druml, Graz University of Technology, Austria
Manuel Menghin, Graz University of Technology, Austria
Christian Steger, Graz University of Technology, Austria
Armin Krieg, Infineon Technologies Austria, Austria
Andreas Genser, Infineon Technologies Austria, Austria
Josef Haid, Infineon Technologies Austria, Austria
Holger Bock, Infineon Technologies Austria, Austria
Johannes Grinschgl, Independent Researcher, Austria

Chapter 14
Dynamically Reconfigurable Embedded Architectures for Safe Transportation Systems

Naim Harb, Polytechnic Faculty of Mons, Belgium
Smail Niar, LAMIH-University of Valenciennes Le Mont Houy, France
Mazen A. R. Saghir, Texas A&M University at Qatar, Qatar

Chapter 15
Embedded Virtualization Techniques for Automotive Infotainment Applications

Massimo Violante, Politecnico di Torino, Italy
Gianpaolo Macario, Mentor Graphics Embedded Software Division, Italy
Salvatore Campagna, Politecnico di Torino, Italy

Chapter 16
Studying Individualized Transit Indicators Using a New Low-Cost Information System

P. A. Castillo, University of Granada, Spain
A. Fernández-Ares, University of Granada, Spain
P. García-Fernández, University of Granada, Spain
P. García-Sánchez, University of Granada, Spain
M. G. Arenas, University of Granada, Spain
A. M. Mora, University of Granada, Spain
V. M. Rivas, University of Jaén, Spain
J. J. Asensio, University of Granada, Spain
G. Romero, University of Granada, Spain
J. J. Merelo, University of Granada, Spain

Chapter 17
Mission Critical Embedded System Development Process: An Industry Perspective

Stefano Genolini, TXT e-solutions, Italy
Matteo Crippa, TXT e-solutions, Italy
Chapter 18
Framework-Based Debugging for Embedded Systems

Gokhan Tanyeri, Clarinox Technologies Pty Ltd
Trish Messiter, Clarinox Technologies Pty Ltd
Paul Beckett, RMIT University, Australia

Chapter 19
Industrial Experiments in IMS, ATC, and SDR Projects of Property Verification Techniques

Emmanuel Gaudin, PragmaDev, France
