Virtual Education: Cases in Learning & Teaching Technologies

Table of Contents

Preface ............................................................................................................................ vii

Fawzi Albaloooshi, University of Bahrain, Bahrain

Part I: The Virtual University

Chapter I. An Overview of Virtual University Studies: Issues, Concepts, Trends ....................................................... 1

Joseph Barjis, The University of Reading, UK

Chapter II. A Framework for the Development of an Accredited Web-Based Computer Information Systems Degree ....................... 21

Kathy S. Lassila, Colorado State University–Pueblo, USA
Kris Howell, Colorado State University–Pueblo, USA

Chapter III. Quality Assurance Issues for a Web-Based Degree in Motor Disability Assessment ...................................................... 34

Salvatore Valenti, Istituto di Informatica, Università di Ancona, Italy
Maurizio Panti, Istituto di Informatica, Università di Ancona, Italy
Tommaso Leo, Dipartimento di Elettronica e Automatica, Università di Ancona, Italy

Chapter IV. A Virtual Advisor Utilizing Multi-Agent Software Teams and Contingency Theoretic Coordination Models .................. 50

John R. Durrett, Texas Tech University, USA
Lisa J. Burnell, Texas Christian University, USA
John W. Priest, University of Texas, USA
Part II: E-Collaboration

Chapter V. Identifying Key Factors of Motivation to Share and Re-Use Pedagogical Documents .................................................................64

Emmanuel Fernandes, University of Lausanne, Switzerland
Fabrice Holzer, University of Lausanne, Switzerland
Maia Wentland Forte, University of Lausanne, Switzerland
Bahram Zaerpour, University of Lausanne, Switzerland

Chapter VI. EFTWeb: A Model for the Enhanced Use of Educational Materials ..........................................................................................75

Luís Borges Gouveia, CEREM, University Fernando Pessoa, Portugal
Joaquim Borges Gouveia, DEGEI, Aveiro University, Portugal

Chapter VII. Group Support Systems and the Removal of Barriers to Creative Idea Generation within Small Groups: The Inhibition of Normative Influence .......................................................................91

Esther E. Klein, Hofstra University, USA

Chapter VIII. E-Business Modeling .......................................................... 113

Tomaso Forzi, Aachen University, Germany
Peter Laing, Aachen University, Germany

Part III: Web-Based Learning & Teaching

Chapter IX. Preparation for E-Learning: An Australian Study (2001) ........................................................................................................ 140

Andrew Stein, Victoria University of Technology, Australia

Chapter X. Strategies for Improving Instructor-Student Communication in Online Education ........................................................................... 156

Stuart C. Freedman, University of Massachusetts Lowell, USA
Steven F. Tello, University of Massachusetts Lowell, USA
David Lewis, University of Massachusetts Lowell, USA

Chapter XI. Current Issues and Trends of Internet-Based Education in the Philippines ................................................................................ 169

Bea V. Espejo, Ateneo De Manila University, The Philippines
Marlene P. Mana, Ateneo De Manila University, The Philippines
Sheila B. Bato, Ateneo De Manila University, The Philippines
Part IV: Effective E-Learning

Chapter XII. Effective Online Learning – Both a Utilization of Technology and Methods ......................................................... 179
  Jan Frick, Stavanger University College, Norway
  Michael Sautter, Telenor Research, Norway
  Svend Øvrebekk, Rogaland Training and Education Center, Norway

Chapter XIII. A 3-Dimensional Framework for Evaluating Multimedia Educational Software .................................................. 195
  Eshaa M. Alkhalifa, University of Bahrain, Bahrain
  Fawzi Albalooshi, University of Bahrain, Bahrain

Chapter XIV. Performance Assessment: A Case for Rubrics in the Virtual Classroom .............................................................. 210
  Apiwan D. Born, University of Illinois at Springfield, USA
  Carol M. Jessup, University of Illinois at Springfield, USA

Chapter XV. Cognitive Styles, Metacognition and the Design of E-Learning Environments .......................................................... 225
  Ray Webster, Edith Cowan University, Australia

Part V: IT Teaching Cases

Chapter XVI. Designing and Implementing an E-Government Application .................................................................................. 242
  Derek Asoh, State University of New York at Albany, USA
  Salvatore Belardo, State University of New York at Albany, USA
  Jakov Crnkovic, State University of New York at Albany, USA

Chapter XVII. Learning to Analyze Unstructured Systems Using Forster’s A Passage to India ......................................................... 256
  Athar Murtuza, Seton Hall University, USA
  Muhammad Ali, Tuskegee University, USA

Chapter XVIII. Great Plans – Little Planning: A Corporate Case Study ...................................................................................... 273
  R. Keith Martin, Fairfield University, USA

About the Authors .................................................................................. 285

Index ...................................................................................................... 295
