Acknowledgment

Editing a book is a quite hard but compensating and enriching task, as it involves a set of different activities like contacts with authors and reviewers, discussion and exchange of ideas and experiences, process management, organization and integration of contents, etc., with the permanent objective of creating a book that meets the readers’ expectations. And this task cannot be accomplished without a great help and support from many sources. As editors we would like to acknowledge the help, support, and belief from all who made possible this creation.

First of all, the edition of this book would not have been possible without the continuing professional support of the team of professionals at IGI Global. We are grateful to Jan Travers, Director of Intellectual Property and Contracts, for the opportunity. A very very special mention of gratitude is due to the Editorial Assistants Brett Snyder and Erin O’Dea, for their professional support and friendly words of advice, encouragement, and prompt guidance.

Special thanks go also to all the staff at IGI Global, whose contributions were invaluable throughout the process of production and making this book available all over the world.

We are grateful to all the authors for their insights and excellent contributions to this book. Also, we are grateful to most of the authors who simultaneously served as referees for chapters written by other authors, for their insights, valuable contributions, prompt collaboration, and constructive comments. Thank you all, authors and reviewers, you made this book! The communication and exchange of views within this truly global group of recognized individualities from the scientific domain and from the industry was an enriching and exciting experience!

We are also grateful to all who acceded to contribute to this book, some of them with high quality chapter proposals, but unfortunately, due to several constraints could not have seen their work published.

Thank you.
