Acknowledgment

I would like to thank all reviewers for their continued support and effort. They retained the quality of the book volume. I thank all chapters’ authors for their contributions. They made the book a possibility. I would also like to take this opportunity to thank the National Natural Science Foundation of China for its support under Grant Numbers 60975080 and 61273367, respectively. Last but not the least, my thanks go to the team, Kayla Wolfe, Jan Travers, Allyson Gard, and Erin O’Dea, at IGI Global for their support and patience. They worked diligently with me throughout the process of editing and production. It has been a pleasure and a learning experience for me to work with them. They made the book a reality.
