The editors would like to acknowledge the help of all involved in the collation and review process of the book, without whose support the project could not have been satisfactorily completed.

We would like to thank all the staff at Idea Group Inc., whose contributions throughout the whole process from inception of the initial idea to final publication have been invaluable. In particular, our thanks go to Kristin Roth, who kept the project on schedule by continuously monitoring our progress on every stage of the project, and to Mehdi Khosrow-Pour and Jan Travers, whose enthusiasm initially motivated us to accept their invitations to take on this project.

We are also grateful to our employers — Monash University and La Trobe University, for supporting this project. We acknowledge the support of the School of Business Systems at Monash and the Department of Computer Science and Computer Engineering at La Trobe in giving us archival server space for the reviewing process.

A special thank goes to Mr. Eric Pardede of La Trobe University, who assisted us in the entire process of the book: from collecting and indexing the proposals, distributing chapters for reviews and re-reviews, constantly reminding reviewers and authors, liaising with the publisher, to many other housekeeping duties which are endless.

In closing, we wish to thank all of the authors for their insights and excellent contributions to this book in addition to all those who assisted us in the review process.
