Preface....................................................................................................................................... vii

Chapter I
Efficient Encodings for Web Service Messages ................................................................. 1
Christian Werner, University of Lübeck, Germany
Carsten Buschmann, University of Lübeck, Germany
Stefan Fischer, University of Lübeck, Germany

Chapter II
NAM: A Network Adaptable Middleware to Enhance Response Time of Web Services ................................................................. 23
Shahram Ghandeharizadeh, University of Southern California, USA
Christos Papadopoulos, University of Southern California, USA
Min Cai, University of Southern California, USA
Runfang Zhou, University of Southern California, USA
P. Pol, University of Southern California, USA

Chapter III
Realizability Analysis of Top-Down Web Service Composition Specifications ................................................................. 50
Xiang Fu, Georgia Southwestern State University, USA
Tevfik Bultan, University of California – Santa Barbara, USA
Jianwen Su, University of California – Santa Barbara, USA
Chapter IV
Efficient Transport Bindings for Web Service Messages............................ 83
Christian Werner, University of Lübeck, Germany
Carsten Buschmann, University of Lübeck, Germany
Tobias Jäcker, EVES Information Technology AG, Germany
Stefan Fischer, University of Lübeck, Germany

Chapter V
A Framework Supporting Context-Aware Multimedia Web Services Delivery ................................................................. 110
Jia Zhang, Northern Illinois University, USA
Liang-Jie Zhang, IBM T.J. Watson Research, USA
Francis Quek, Virginia Tech, USA
Jen-Yao Chung, IBM T.J. Watson Research, USA

Chapter VI
Adaptive Search- and Learning-Based Approaches for Automatic Web Service Composition......................................................... 135
Nikola Milanovic, Technical University Berlin, Germany
Miroslaw Malek, Humboldt University Berlin, Germany

Chapter VII
XWRAPComposer: A Multi-Page Data Extraction Service .................... 189
Ling Liu, Georgia Institute of Technology, USA
Jianjun Zhang, Georgia Institute of Technology, USA
Wei Han, IBM Research, Almaden Research Center, USA
Calton Pu, Georgia Institute of Technology, USA
James Caverlee, Georgia Institute of Technology, USA
Sungkeun Park, Georgia Institute of Technology, USA
Terence Critchlow, Lawrence Livermore National Laboratory, USA
David Buttler, Lawrence Livermore National Laboratory, USA
Matthew Coleman, Lawrence Livermore National Laboratory, USA

Chapter VIII
An SLA-Based Auction Pricing Method Supporting Web Services Provisioning.......................................................... 224
Jia Zhang, Northern Illinois University, USA
Ning Zhang, Cornell University, USA
Liang-Jie Zhang, IBM T.J. Watson Research, USA
Chapter IX
Dynamic, Flow Control-Based Information Management for Web Services

Zahir Tarie, RMIT University, Australia
Peter Bertok, RMIT University, Australia
Dusan Simic, RMIT University, Australia

Chapter X
Model-Driven Semantic Web Services

Gerald C. Gannod, Miami University (Ohio), USA
John T.E. Timm, Arizona State University – Tempe, USA
Raynette J. Brodie, Arizona State University – Tempe, USA
