A book of this nature requires assistance from many individuals. The chapters went through several screenings. The initial proposal and then the first draft were reviewed by at least two experts in the area. Conditionally accepted papers were revised and re-reviewed by the original reviewers. Some papers went through three evaluations before being accepted or rejected. Twenty-five out of 40 papers were accepted. I would like to acknowledge all of the reviewers who gave their time and effort to help make this a quality publication.

I would like to thank Professor Starr Roxanne Hiltz, New Jersey Institute of Technology, who agreed to forward this book and provided suggestions for improving the content. A book like this cannot be completed without sacrifice and dedication of other individuals. My sincere thanks go to Mr. Nicholas St. Angelo for helping with editing, logistics, and streamlining of the content, many times with little notice. This book could not have been finished in time without his help and support. In addition, I would also like to thank M. Alper Yildirim and Mr. Gurpreet Singh for helping with the day-to-day monitoring and correspondence. I appreciate all the support and guidance provided by Idea Group Publishing. My special thanks go to Ms. Michele Rossi, Ms. Amanda Appicello, and Ms. Jan Travers, Senior Managing Editor at Idea Group Publishing for their understanding and patience. I would also like to thank the staff at Idea Group Publishing for their hard work in editing and making this book a reality. Last but not least, I would like to thank Professor Mehdi Khosrow-Pour for giving me this wonderful opportunity to edit this timely book.
