Table of Contents

Foreword ..............................................................................................................................................xviii

Preface ..................................................................................................................................................xxi

Acknowledgment .................................................................................................................................xiii

Section 1 Curricula Changes

Chapter 1
Making Sense of Science: A Review in Scottish Further Education .................................1
   Nancy El-Farargy, UK National Health Service, UK

Chapter 2
Developing Scientific Literacy: Introducing Primary-Aged Children to
Atomic-Molecular Theory ..................................................................................................................30
   Jennifer Donovan, University of Southern Queensland, Australia
   Carole Haeusler, University of Southern Queensland, Australia

Chapter 3
Implementing the Understanding by Design Framework in Higher Education ..........................64
   Judy Alhamisi, Marygrove College, USA
   Blanche Jackson Glimps, Tennessee State University, USA
   Chukwunyere E. Okezie, Marygrove College, USA

Chapter 4
Martial Arts and Physics: A Multidisciplinary Approach to Increase Student
Engagement and Interest in the Sciences ..........................................................................................80
   Eugenie de Silva, Harvard University, USA
Chapter 5
The Inclusion of Multidisciplinary Research in Science Teaching: A Novel Teaching Method ................................................................. 99
Eugene de Silva, Virginia Research Institute, USA & MRAS – Walters State Community College, USA
Eugenie de Silva, Harvard University, USA
Jeffrey Horner, Walters State Community College, USA
Pamela Knox, Tennessee Board of Regents, USA

Section 2
Content Presentation

Chapter 6
Developing a Research-Informed Teaching Module for Learning about Electrical Circuits at Lower Secondary School Level: Supporting Personal Learning about Science and the Nature of Science ........................................... 122
Keith S Taber, University of Cambridge, UK
Kenneth Ruthven, University of Cambridge, UK
Christine Howe, University of Cambridge, UK
Neil Mercer, University of Cambridge, UK
Fran Riga, University of Cambridge, UK
Riikka Hofmann, University of Cambridge, UK
Stefanie Luthman, University of Cambridge, UK

Chapter 7
Presenting Physics Content and Fostering Creativity in Physics among Less-Academically Inclined Students through a Simple Design-Based Toy Project .................................................................................................................. 157
Nazir Amir, Greenview Secondary School, Singapore
R. Subramaniam, Nanyang Technological University, Singapore

Section 3
Research

Chapter 8
Using Multidisciplinary Research Experiences to Enhance STEM Learning through Undergraduate, Team-Based, Summer Research Projects for At-Risk Students .......................................................................................................... 198
Jennifer Yantz, Middle Tennessee State University, USA
Brittany D. Smith, Middle Tennessee State University, USA
Ginger Holmes Rowell, Middle Tennessee State University, USA
Thomas Cheatham, Middle Tennessee State University, USA
Donald Nelson, Middle Tennessee State University, USA
D. Christopher Stephens, Middle Tennessee State University, USA
Elaine Bouldin Tenpenny, Middle Tennessee State University, USA
Chapter 9
Collaborative Teams as a Means of Constructing Knowledge in the Life Sciences: Theory and Practice ...............................................................221
Grant E. Gardner, Middle Tennessee State University, USA
Kristi L. Walters, East Carolina University, USA

Chapter 10
Interdisciplinary Problem-Based Learning Practices in Higher Education......243
Despo Ktoridou, University of Nicosia, Cyprus

Chapter 11
Transdisciplinary Research in Sustainable Scientific Education in the Field of Urbanism and Architecture .............................................264
Svetlana Perović, University of Montenegro, Montenegro

Chapter 12
Pre-Service Teachers’ Self-Efficacy and Attitudes toward Learning and Teaching Science in a Content Course....................................................277
Cindi Smith-Walters, Middle Tennessee State University, USA
Heather L. Barker, Middle Tennessee State University, USA

Section 4
Cases on Research-Based Teaching Methods in Science Education

Chapter 13
Traditional Teaching and Its Effect on Research-Based Teaching: Science via Online Instruction .................................................................304
LaToya N. Johnson, Walden University, USA
Dana-Marie Thomas, Walden University, USA
K. Y. Williams, Walden University, USA & Kaplan University, USA & Department of Defense, USA

Chapter 14
Research Institutions: Research-Based Teaching through Technology ..........326
K. Y. Williams, Walden University, USA & Kaplan University, USA & Department of Defense, USA
Chapter 15
Application of Information and Communication Technology to Create
E-Learning Environments for Mathematics Knowledge Learning to Prepare
for Engineering Education ..................................................................................................................345
Tianxing Cai, Lamar University, USA

Compilation of References ...........................................................................................................374

About the Contributors ..................................................................................................................411
