# Table of Contents

Foreword .............................................................................................................. xx

Preface .............................................................................................................. xxiv

**Section 1  
Leveraging Technology to Teach Specific Content**

**Chapter 1**  
Leveraging Dynamic and Dependable Spreadsheets Focusing on Algebraic Thinking and Reasoning .................................................................................. 1  
*Margaret L. Niess, Oregon State University, USA*

**Chapter 2**  
A Case Study of Primary School Students’ Use of a Dynamic Statistics Software Package for Analyzing and Interpreting Data .............................................. 24  
*Irene Kleanthous, Cyprus Ministry of Education, Cyprus  
Maria Meletiou-Mavrotheris, European University, Cyprus*

**Chapter 3**  
Local Lotto: Mathematics and Mobile Technology to Study the Lottery .......... 43  
*Vivian Lim, University of Pennsylvania, USA  
Erica Deahl, Massachusetts Institute of Technology, USA  
Laurie Rubel, City University of New York, USA  
Sarah Williams, Massachusetts Institute of Technology, USA*

**Chapter 4**  
Bringing Dynamic Geometry to Three Dimensions: The Use of SketchUp in Mathematics Education ................................................................................. 68  
*Nicholas H. Wasserman, Teachers College, Columbia University, USA*
Chapter 5
Playing with Perpendicular Lines: The Case of Laura ......................... 100
  Douglas A. Lapp, Central Michigan University, USA
  Dennis St. John, Central Michigan University, USA

Chapter 6
Students’ Experiences Composing and Decomposing Two-Dimensional Shapes in First and Second Grade Mathematics Classrooms ..................... 121
  Drew Polly, University of North Carolina at Charlotte, USA
  Trisha Hill, Kannapolis City Schools, USA
  Tabitha Vuljanic, Kannapolis City Schools, USA

Section 2
Leveraging Technology to Support Mathematical Practices

Chapter 7
Using New Technologies to Engage and Support English Language Learners in Mathematics Classrooms ................................................................. 144
  Robert Pritchard, Sacramento State University, USA
  Susan O’Hara, University of California – Davis, USA
  Jeff Zwiers, Stanford University, USA

Chapter 8
The Port Lesson: Grade 5 Mathematics Modeling for a Local Context .......... 162
  Charles B. Hodges, Georgia Southern University, USA
  Edie R. Hipchen, Golden Isles Elementary, USA
  Traci Newton, Golden Isles Elementary, USA

Chapter 9
What Does Technology Bring to the Common Core Mathematical Practices? ........................................................................................................ 179
  Marshall Lassak, Eastern Illinois University, USA

Chapter 10
Utilizing Technology to Engage in Statistical Inquiry in Light of the Standards for Mathematical Practice ......................................................... 205
  Christine Browning, Western Michigan University, USA
  Dustin Owen Smith, Western Michigan University, USA
Chapter 11
Using Dynamic Geometry Software to Engage Students in the Standards for Mathematical Practice: The Case of Ms. Lowe .................................................. 227
   Milan Sherman, Drake University, USA
   Carolyn McCaffrey James, Portland State University, USA
   Amy Hillen, Kennesaw State University, USA
   Charity Cayton, East Carolina University, USA

Section 3
Examples of Technological Tools to Support Teaching and Learning

Chapter 12
Integrating Multimedia Animations to Support Common Core State Standards in Mathematics Classrooms ................................................................. 258
   Jesus Trespalacios, Boise State University, USA
   Karen Trujillo, New Mexico State University, USA
   Lida J. Uribe-Flórez, New Mexico State University, USA

Chapter 13
Teaching Fundamental Math Concepts: There’s an App for That ... Or is There? ........................................................................................................ 268
   Jennifer Wall, Northwest Missouri State University, USA
   Michael P. Rogers, Northwest Missouri State University, USA

Chapter 14
Interactive Whiteboards: Preparing Secondary Mathematics Teachers to Avoid Catch-22 ................................................................. 288
   Tracy Goodson-Espy, Appalachian State University, USA
   Lisa Poling, Appalachian State University, USA

Chapter 15
Young Children, Mathematics, and Coding: A Low Floor, High Ceiling, Wide Walls Environment ................................................................. 308
   George Gadanidis, Western University, Canada

Chapter 16
Leveraging Interactive Clickers as a Tool for Formative Assessment ............ 330
   Drew Polly, University of North Carolina at Charlotte, USA
   Elizabeth Rodgers, Kannapolis City Schools, USA
   Melissa Little, Kannapolis City Schools, USA

Chapter 17
Mathematics Gaming in Early Childhood: Describing Teacher Moves for Effective and Appropriate Implementation ........................................ 351
   Alejandra Salinas, Boston University, USA
   Chu Ly, Boston University, USA
Chapter 18
Using the AMC Anywhere Web-Based Assessment System to Examine Primary Students’ Understanding of Number Sense ........................................... 365
  Christie Sullivan Martin, University of South Carolina, USA
  Drew Polly, University of North Carolina at Charlotte, USA

Section 4
Leveraging Technology to Support Mathematics Education Courses and Programs

Chapter 19
Teaching and Learning the Common Core State Standards in Mathematics with Web 2.0 Tools ................................................................. 379
  Jeffrey Hall, Mercer University, USA
  Lucy Bush, Mercer University, USA
  William Lacefield, Mercer University, USA

Chapter 20
Contextualizing Algebraic Word Problems through Story Using Technology........................................................................................................ 398
  Terri L. Kurz, Arizona State University – Polytechnic, USA
  Barbara Bartholomew, California State University – Bakersfield, USA
  Amanda Sibley, Arizona State University – Polytechnic, USA
  Scott Fraser, Arizona State University – Polytechnic, USA

Chapter 21
The Synergism of Mathematical Thinking and Computational Thinking ....... 416
  Gerard Rambally, University of North Texas at Dallas, USA

Chapter 22
Application of Information and Communication Technology to Create E-Learning Environments for Mathematics Knowledge Learning to Prepare for Engineering Education ................................................................. 438
  Tianxing Cai, Lamar University, USA

Compilation of References ............................................................................ 468

About the Contributors .................................................................................... 507
