Table of Contents

Preface ................................................................................................................................. xiv

Acknowledgment .................................................................................................................. xviii

Section 1
Kernel Security and Reliability

Chapter 1
Kernel Stack Overflows Elimination .................................................................................. 1
   Yair Wiseman, Bar-Ilan University, Israel
   Joel Isaacson, Ascender Technologies, Israel
   Eliad Lubovsky, Bar-Ilan University, Israel
   Pinchas Weisberg, Bar-Ilan University, Israel

Chapter 2
Device Driver Reliability ...................................................................................................... 15
   Michael M. Swift, University of Wisconsin—Madison, USA

Chapter 3
Identifying Systemic Threats to Kernel Data: Attacks and Defense Techniques .................. 46
   Arati Baliga, Rutgers University, USA
   Pandurang Kamat, Rutgers University, USA
   Vinod Ganapathy, Rutgers University, USA
   Liviu Iftode, Rutgers University, USA

Chapter 4
The Last Line of Defense: A Comparison of Windows and Linux Authentication and Authorization Features ........................................................................................................... 71
   Art Taylor, Rider University, USA
Section 2
Efficient Memory Management

Chapter 5
Swap Token: Rethink the Application of the LRU Principle on Paging to Remove System Thrashing

Song Jiang, Wayne State University, USA

Chapter 6
Application of both Temporal and Spatial Localities in the Management of Kernel Buffer Cache

Song Jiang, Wayne State University, USA

Chapter 7
Alleviating the Thrashing by Adding Medium-Term Scheduler

Moses Reuven, Bar-Ilan University, Israel
Yair Wiseman, Bar-Ilan University, Israel

Section 3
Systems Profiling

Chapter 8
The Exokernel Operating System and Active Networks

Timothy R. Leschke, University of Maryland, Baltimore County, USA

Chapter 9
Dynamic Analysis and Profiling of Multithreaded Systems

Daniel G. Waddington, Lockheed Martin, USA
Nilabja Roy, Vanderbilt University, USA
Douglas C. Schmidt, Vanderbilt University, USA

Section 4
I/O Prefetching

Chapter 10
Exploiting Disk Layout and Block Access History for I/O Prefetch

Feng Chen, The Ohio State University, USA
Xiaoning Ding, The Ohio State University, USA
Song Jiang, Wayne State University, USA
Chapter 11
Sequential File Prefetching in Linux ................................................................. 218
   Fengguang Wu, Intel Corporation, China

Chapter 12
Peer-Based Collaborative Caching and Prefetching in Mobile Broadcast .................. 238
   Wei Wu, Singapore-MIT Alliance, and School of Computing, National University of Singapore, Singapore
   Kian-Lee Tan, Singapore-MIT Alliance, and School of Computing, National University of Singapore, Singapore

Section 5
Page Replacement Algorithms

Chapter 13
Adaptive Replacement Algorithm Templates and EELRU........................................ 263
   Yannis Smaragdakis, University of Massachusetts, Amherst, USA
   Scott Kaplan, Amherst College, USA

Chapter 14
Enhancing the Efficiency of Memory Management in a Super-Paging Environment by AMSQM ................................................................. 276
   Moshe Itshak, Bar-Ilan University, Israel
   Yair Wiseman, Bar-Ilan University, Israel

Compilation of References .................................................................................. 294

About the Contributors ....................................................................................... 313

Index .................................................................................................................. 316
