Acknowledgment

We would like to express our gratitude to IGI Global for their support throughout the stages of preparing the book. We express our appreciation to UiTM and KWASU authorities for facilities and enabling the environment and space granted to us for writing the book. We equally appreciate all suggestions, observations, and input from all the unknown reviewers chosen by IGI Global for evaluation of the manuscripts. We are also indebted to our families for being patient with us, especially during the sleepless period of writing the book. Finally, we thank all our research assistants for their timeless efforts rendered in data collections. May God reward them abundantly and let this new volume be helpful and useful to them and enrich their knowledge of policy implications for ICT adoption in the public sector.
